

ERRATA.

On page 598, right hand column, second line, for "Holder" read "Hanton."

On page 600, right hand column, eighth line, after Studentship, insert "H. C. Bowen, the Angas Engineering Exhibition; R. Trüdinger the First University Scholarship."

Age Chronicle

NON EST BONUM.

VOL. VI.—No. 75.

ADELAIDE, JANUARY 19, 1903

[PRICE SIXPENCE.]

School Notes.

Our Head Master has been elected President of the South Australian Literary Societies' Union for the year 1903.

He has also been re-elected Warden of the Senate of the University of Adelaide (for the 20th year), and also a member of the Council of the University of Adelaide.

Lieut.-Col. J. S. Lyster, the Commandant of the Commonwealth Military Forces in South Australia, paid us a visit the other morning. He was attended by Captain Bassé. The cadets were hurriedly called out, marshalled by Lieutenant Bayly, and drawn up to receive him. Colonel Lyster carefully inspected and spoke words of commendation. In an interview with the Head Master he promised his best efforts to put the corps on a sound footing, and to make it increasingly efficient and useful.

On February 2, 1903, the busy hum murmurs forth here once more—or like

Mr. Mantalini, again we begin to turn the mangle. Shades of our fathers, are your sons indolent! They started the history of P.A.C. on January 18 in 1869, and about that date for several years following. Were they fonder of work and less given to pleasure then? Here, it won't do for me to be *laudator temporis acti*, or any little kindly feeling still left for an editor will vanish like Macbeth's witches or Hans Breitmann's party.

The three-term system long regnant in England is to be tried here in 1903, and thereafter if it proves to suit our conditions. It is almost universal in the old land for all first-grade and second-grade schools. Here it promises to fall in with the University examinations scheme, and must not secondary schools pay good heed to them? From February 2 to May 8 (fourteen weeks), then a good rest of two weeks. From May 15 to August 28, and then those of the Fourth Form that like will have spent their last week at the "Primary" having had thirteen unbroken weeks before to prepare for

it (or as nearly unbroken as public holidays permit). They can begin their third term on September 14 with new plans and hopes; while the Fifths and Sixths can commence on the same date with an uninterrupted period to culminate in the Junior, Senior, or Higher.

The dates of the athletic fixtures may need reconsideration, and now is the time for the irresponsible or—worse still—anonymous critic. Doubtless the sports committees of the two schools will be equal to the occasion, even though we for the time have lost our head.

And now the great cricket match is over, and "The shout of a king is heard in our camp." No, strange enough to those who don't know the Australian boy, "all is calm," or, to finish the line, "and joy and peace," too. Most philosophic is the way he takes victory. Defeat seems to loosen his tongue and to set him talking of the might have been—almost ought to have been but for a moment's heedlessness or bad luck. But victory! Oh, no, we never mention it, or not often. Mothers and sisters do, but they don't understand; and we are bored, and wish they wouldn't. *Nuff sed.*

The Higher Public list brought us great success. Darwin and Trüdinger first and second on the "honors" roll, and five others of "ours" in the same

high class—Fry, Ellis, Bowen, Evans, and Holder. Seven out of the thirteen names were from P.A.C.—all other schools put together only six. Keep it up!

For the Angas Engineering Exhibition three candidates qualified—Darwin, Bowen, and Hanton—and all from P.A.C.

Darwin was thus endowed with an *embarras de richesse*. He had his choice of the Angas in the gift of the University, or of the Spicer in the gift of P.A.C., but could not hold both. Either would allow him to pursue the study of science, and that is the course he wishes to take. Trüdinger and Bowen must have awaited his "election" with interest, perhaps anxiety. He chose the "Edward Spicer," and according to precedent will receive with it the "Hartley Studentship" at the University. He has won great glory and very rich prizes. The Angas will now be borne off by H. C. Bowen, and right well deserved. He will make good use of the great opportunities it affords. R. Trüdinger's steady perseverance will doubtless be rewarded by the First University Scholarship, and H. K. Fry will receive the Third. That is, of five Entrance Scholarships at the Adelaide University again our fellows bear off four.

Five out of the six successful candidates for the "Exhibitions" offered by

the Education Department of the Government of South Australia have elected to come to P.A.C. for their further studies. These Exhibitions are open to all competitors in S.A. and tenable at any approved high school, so for five out of the six to choose to come here is another "feather in our cap." We welcome Mowat, Baker, Longson, Pinch, and Slade, and hope that they will have as good a course with us as their predecessors of the same designation. Better they hardly could have. Three of the successful six are from our friends and neighbors of Norwood Public School, and three from Sturt Street, where for so long our old scholar and ex-master, Mr. Maughan, held sway.

We are glad to hear of the purchase of what we have long rented and played in and known as "Smith's paddock." It contains an acre and a quarter, adjoins our playing grounds, and seems to be the only possible extension of them. Of course there are the park lands in front, where we have had playing space allotted us for many years, and hope to again. There isn't room even now on our own ground for first and second football eighteens to play matches on the same day. For a long time the Norwood Football Club let us use theirs, and we hoped to secure that when they gave it up, but the Christian Brothers out-generalled us. However, we are

glad to have this piece of land for our "very own," though it is small and costly. £1,974 was the market price according to valuation, but Sir E. T. Smith generously gave back £124, as it was to be secured by the College and he wanted us to have it.

It is hoped that 1903 will see the railings erected round the grounds, and the road that so seriously curtails the playing space done away with. Then our front ground will afford proper space for football and cricket practice and matches.

In many of the public schools of our Commonwealth tablets are being erected to keep in perpetual memory the names of "old boys" who played a manly part in the war in South Africa. The strain of patriotism is strong within us yet. Cannot we put up some similar memorial and thus honor our brave fellows and ourselves? The difficulty would be to compile a complete and correct list. The Old Boys' Association seems the very organisation to collect the names. They would confer a lasting service on the old school if they would do it.

The "great public schools" in and near Sydney hold an "annual championship meeting." Their last, recorded in their chronicles just to hand, suggests interesting and maybe instructive comparisons with our intercolle-

giate sports. They speak of two "records" this time—the 100 yards at $10\frac{3}{10}$ secs., and 120 hurdles at $16\frac{1}{3}$ secs. Our 120 hurdles this year was done in the same time, and our 100 flat was done in $10\frac{3}{5}$ secs. Their running high jump was cleared at 5 ft. $2\frac{1}{2}$ in., with two others over 5 ft. $1\frac{1}{2}$ in., and so was ours. They have kicking the football (distance), and throwing the cricket ball; also a mile race and a team race that we have not, and they have more races for juniors, dividing them into under 15 and under 13. They have no 220 and no 150.

Our school scholarships this year fall as follows:—

The Edward Spicer to L. J. Darwin.

The Old Collegians' to H. C. Bowen.

The Colton to R. Trüdinger.

The Longbottom to H. H. Hanton.

The Robb to S. L. Corry.

The Malpas to W. A. V. Drew.

L. T. Burgess has the Alfred Muecke Prize.

The Senior Elder falls to R. Leggoe.

The Senior Elder held by W. B. Angwin is renewed, and so is that held by R. Trimmer.

The Junior Elder has been won by T. G. Fleming.

H. C. Fry has the Cotton Medal, F. R. French the Smith History Prize, and R. W. Tassie the Arithmetic Prize.

In addition to these of our own, at the University in competition open to all South Australia, L. J. Darwin has won the Hartley Studentship, and H. K. Fry the Third University Scholarship. At the Senior Examination F. N. Bennett gains the first prize of ten pounds; and at the Junior, L. F. Burgess has the third prize.

We heartily congratulate the winners. In mere money value these prizes are worth a considerable sum, close on £800, and the value of the mental discipline and growth made evident by such success, and made possible by the paths to future study thus open, is quite beyond estimate.

G. D. Cowan deserves our heartiest congratulations on winning at the Junior the much-coveted Tennyson Medal for English Literature. May he do greater things yet.

Speech Day, 1902.

The Speech Day gathering in the Town Hall went off most successfully. The boys must have nearly all been there, and it was a fine sight from the platform, this solid square of close on

three hundred. The singing was unusually sweet and good. It always has shown clear signs of careful and skilful teaching since Mr. Robertson took it in hand; but this year's was better than ever. The recitations went off well too. His Excellency the Lieutenant Governor was as splendid a chairman as ever, picking out the good points in everything and everybody, making all pleased with themselves, and making all go off happily and briskly and brightly.

Suffer two words of criticism. It would be far better to hold this celebration at the school if it were possible. There is not a room big enough yet. But no generous friend or "old boy" could endow us with anything we need more than a large hall for examination purposes and great gatherings. That improvement the "past" and the wealthy alone can effect. But the other lies with the "present" and the boys themselves. Ought not more Senior Boys to take part in the programme? Drew as cricket captain and Haslam with his pianoforte solo were the only ones that did this time. The "Speeches" are practically all done by the higher boys in most British schools, and they used to do much more here. English, Latin, Greek, French, German, Recitations, appear on the Bill at Harrow, and so do essay and poems written by the boys, hexameters, elegiacs, a scene from an English classic play and from a Greek

one too, solos and duets, and quartets. Such things are far beyond us yet, and perhaps too past the patience of the audience. To Harrow they come at eleven and stay till six. We think two hours almost too long. But the seniors, especially those about to leave, to have no further opportunity of playing a part on the school stage, should come forward many more of them on their last speech day.

Besides the chairman, Sir S. J. Way, Bart., there were upon the platform several staunch friends of the College, Sir Frederick Holder, the Hon. A. Catt, J. Darling, Esq., M.P., Mr. A. W. Piper, Mr. E. B. Colton, Mr. G. S. Cotton, Mr. A. E. Davey, and many ministers.

May boys endorse what their Head Master says? Well they interrupted his Speech often with cheers, but none so hearty as when he spoke highly of Mr. Grey's services or thanked Mr. Langley for his work in the classroom and as Sports Master. And again did the applause break out as the Lieutenant Governor from the chair spoke highly of the ability and devotion to duty of Mr. Bayly and the others masters.

The University lists had not been issued, and as some scholarships depend on the marks earned at them, and no boy is allowed to hold two of our school scholarships at the same time, the scholarships could not be announced.

That was a pity. Maybe some boys had hoped for their prize money to spend while off for their holiday and had to start without it.

The Captain of the cricket eleven read the results of the sports contests as follows:—

In four contests in which we take the most interest, viz., the annual matches with St. Peter's in football, gymnastics, athletics, and cricket, the honors this year are evenly divided. The football we lost, scoring only 7 goals 4 behinds to our opponents 9 goals 7 behinds. Hugo Throssell made a brilliant captain, and D'Arcy Cowan, Homburg, Haslam, and Darling played a great game. Practice had been very satisfactory. The second eighteen had rallied round the first and helped them splendidly. Especially had the goal-kicking improved. At one time we were ahead, even in the last quarter we were once only 2 points behind, but finally St. Peter's proved too strong, and won by 15 points, and they bore off Lord Tennyson's handsome cup. In gymnastics we got home by a narrow margin, and brought the shield back to P.A.C. with us, and it bears Throssell's name for 1902. In the athletic contests we again sustained a decisive defeat, mainly due to the fine running of G. C. Campbell. For us W. B. Angwin made great efforts, and came in a good second to him in every sprint, but was not quite fast enough.

And the session closed yesterday with a glorious victory at cricket. We scored 318 in our first, St. Peter's only 179 and 115 in their two tries. So we win by an innings and 24, the biggest success in the long series of contests. Stanley Hill's score of 99, Homburg's 63, the good bowling of Christoph, Hill, and Jefferis, the smart, all-round fielding, and the sure catching of Townsend largely contributed to the success. The value of the help which the second eighteen gave to the first in the practice has already been acknowledged. They also did hard work in their own matches. In the form matches there were some exciting contests, but the sixth still hold the senior shield presented by W. D. Taylor, and the fourth that given by R. H. Lever. Tennis has had its lovers too, its matches, and tournaments, Johnston holds the championship. We shall miss Mr. Langley from our management for the first term of next year, and we take this opportunity to thank him heartily for the great services he has rendered the school as Sports master, and to wish him a pleasant holiday and a safe and speedy return. (Cheers.)

HIS EXCELLENCY'S SPEECH.

SIR SAMUEL WAY said that whenever he came to the speech-day of Prince Alfred College he had the joyful sensation of being connected with a pros-

perous and progressive institution. (Cheers.) Mr. Chapple had told them that there were more boys than last year. In all his visits to the speech day of Prince Alfred College he had never seen so large a space of the floor of the Town Hall filled by the boys as on the present occasion. He had never seen so many ladies in the aisles, and he had certainly never before seen such a galaxy of beauty in the gallery. (Laughter.) He never forgot the past. He was proud of the present, and also of the past. No speech day of Prince Alfred College would ever pass without a word of gratitude to its founders. He hoped for centuries to come that finest of the old colonists of South Australia, the late Sir John Colton, would be an example and an inspiration to the boys of Prince Alfred College. (Cheers.) He was proud—and he thought the boys were also proud—of their headmaster, Mr Chapple. (Cheers.) He called him a great headmaster. (Cheers.) He did not think they would do him justice until the plan was carried out of adorning the schoolroom of the college with a fine bust of marble which would carry his lineaments down to all succeeding ages. (Cheers.) Present company excepted, the greatest of headmasters of modern times was Dr. Arnold, and he said that a headmaster's life ought not to be longer than 20 years—he evidently did not know the staying power of Mr. Chapple. (Cheers.)

He (Sir Samuel) had a personal interest in this matter. He became Chief Justice in the same year that Mr. Chapple became headmaster, and if a long way on the twentieth century it were suggested that it was time for Mr. Chapple's successor to be appointed, the present Chief Justice would shake for fear that he himself would be replaced by a boy from Prince Alfred College. (Laughter.) He was not joking when he mentioned the boys from Prince Alfred College in connection with seats of justice. When they got rid of the present occupant, the position of Chief Justice would go to one of half a dozen able lawyers—and he would not tell them how many boys of Prince Alfred College were among that distinguished half dozen, but there was a good proportion. (Cheers.) During the past year the most eloquent, effectual, and triumphant speech he had ever heard at the bar of the Supreme Court, or at the bar of any tribunal, was delivered by an eloquent advocate, who was an old boy of Prince Alfred College. (Cheers.) He saw they were beginning to be afraid that he was going to tell them all about the old boys. (Laughter.) He invited them to look at the other side of the world. The most distinguished graduate of the University of Adelaide, if they were to judge by his present academical honors, was Professor Hudson Beare, who was once a professor in the

City of London, and who was cried off amidst triumph, above all other teachers to be a professor at Edinburgh. (Cheers.) He was glad Mrs. Chapple was on the platform that day. There was no pride that was more allowable, which touched a higher point of virtue, than a mother's pride in her son. They all knew that young Chapple, who was teaching at the University of Cambridge, and doing admirable work there, would very soon run Professor Hudson Beare hard for the premier position. (Cheers.) He was not going to speak about their successes on the cricket field. He did not know as much about cricket as half a century ago, when he retired from a somewhat inglorious career on the cricket field. He was glad, though, that in respect to cricket Prince Alfred College could carry off honors, and that if Clement Hill had now become "an old boy" there was another boy of the same name that was able to lead the van in that magnificent game. (Cheers.) He had had to use his voice vigorously at the commemoration on the previous day to obtain a hearing. When the boys now before him went to the University there would not be any such difficulties. (Cheers.) They were admirably trained. (Cheers.) He wished he could change his hoarse and broken notes at the present moment for the beautiful voice of young Wood. That had made him wonder what he was

going to become in the world—whether he would hold a senate spell-bound, whether he would astonish the bar, with an eloquence never surpassed in the history of South Australia, or whether, like the president of the Methodist Conference, he would keep whole congregations drinking in the words that fell from his lips in the course of beautiful sermons. (Cheers.) He almost wished he were a Prince Alfred boy. If he could put the hand of the clock back half a century or more he would esteem it a great privilege to be one of their number. They should be proud that there were nine young men who by hard work, and by the intellectual training which they received within the walls of Prince Alfred College were among the number who gained degrees at the University commemoration the previous day. (Cheers.) Any school on the continent would be proud of such an achievement. There was, however, another grand success which Mr. Chapple had mentioned, but which was not announced at the university, and was now being notified for the first time. In the whole course of his experience he had never known Professor Bragg to be so enthusiastic over the work of one of his students as he was over the brilliant success of J. Raymond Wilton, who belonged to this college. (Cheers.) In two years he had performed the whole mathematical course in honors, and it was

only time that prevented him taking his degree. (Cheers.) Professor Bragg had told him that if Wilton could be sent to Cambridge he would certainly become one of the Wranglers—and very probably the first. (Cheers.) He was proud of the boys of the past and hopeful of the boys of the present. He did not believe that Prince Alfred College ever had a set of boys who could do more honor to the institution than the fine young fellows he saw before him. Mr. Chapple had referred to the Rhodes scholarship, and he quite agreed with his remarks. There was no tribunal in South Australia so well fitted to judge impartially as to the merits of a candidate as the examining board of the University of Adelaide. He agreed with him also that the intention of the patriotic donor of that scholarship intended that it should be used, not for University students or old boys, but to pass on boys from Prince Alfred College, St. Peter's College, Way College, the School of Mines, and similar institutions, to have the advantage of the training and influences of the University of Oxford. When that scholarship was properly established he hoped he would have the privilege of congratulating Prince Alfred College on having gained it. (Cheers.) He wished the boys what they well deserved—an enjoyable holiday, a merry Christmas and a happy New Year. (Cheers.)

Old Boys.

Early in October we were favored with a visit by Captain F. M. Rowell, who had recently returned to our state after more than two years' campaign in South Africa and then a visit to England in connection with the Coronation festivities. Captain Rowell went in charge of the South Australian unit sent from South Africa to London. He spoke very enthusiastically of England, its wealth and its wonders, and of the courtesy and kindness shown on every hand to the visiting troops from the colonies. While they were quartered near London, Harold Chapple and Bob Osborne paid them a visit, and upon subsequent occasions Mr. Rowell met Richard Lever and several other old schoolfellows. Needless to say, the meetings afforded great pleasure on both sides.

We heartily congratulate Mr. J. H. Chinner upon his election as Mayor of Unley. There are many features of the election which give his friends pleasure. Unley is the largest suburb of Adelaide; the candidature was undertaken at the request of members of the Council; and the return was by a majority in every ward and by the largest vote ever given to a Mayor of Unley.

The "Old Scholars' Scholarship" has

now been founded for all time by the Association paying over a capital sum and the college executing a deed. Also Mr. Peter Wood (an esteemed "old boy") has on behalf of Messrs. G. Wood, Son, & Co. (who include besides Mr. Wood, our good friend Mr. James Gartrell, and another "old boy," Mr. W. D. Taylor) a scholarship for the son of an assistant in the grocery business.

Messrs. B. Smeaton, M.B., Ch.B., and P. Crank, L.D.S. and R.C.S., and E. J. Counter, D.D.S., have been appointed by the Government as three of the six members of the first Dental Board. We congratulate them on this mark of public esteem.

"Old boys" at the Australian Universities have done well this year. Fourteen of them have won their degrees. W. A. Hunter, P. L. Broadbent, O. S. Flecker, and L. J. Robertson have won their medical degrees at Sydney, W. H. Kelly his M.B., and D. M. Lyall his B.A. at Melbourne. And at Adelaide F. F. Muecke has his M.B. (in the First Class), F. J. Searle (with Honors in Classics), H. E. Noltenius, R. A. West, and A. L. Nairn have the Bachelor of Arts degree, and B. L. Gardiner, A. E. Paton, and H. J. Priest the Bachelor of Science degree. In addition A. S. Clark, B.Sc., and B. H. Moore, B.Sc., have ob-

tained the Diploma in Mining Engineering and Metallurgy of the University of Adelaide and the Fellowship of the South Australian School of Mines, and W. G. Bell and D. W. S. McArthur the Diploma in Mining and Metallurgy and Honors in Mining Engineering. This is for post graduate work. We heartily congratulate all, and wish them all the success they are now qualified to win.

Few of our boys have turned to the law lately, but C. P. Latty (who two years ago won us the match by his brave defence with L. T. Cowan of the eighth wicket) is going on his course by passing Constitutional Law and Logic, while C. R. Doudy scores, as might be expected, in English History.

In the Commercial Law we note with pleasure A. R. Hogben, C. B. McMichael, and E. H. Waddy.

In Fourth Year Medicine, R. E. Magarey comes out in the First Class. In the Third Year, M. L. Scott has won a Second Class, and R. G. Barnard a Third Class. In the Second Year, R. D. Brummitt, Dean Dawson, and W. M. Hunn are in the Second Class, and in the First Year R. G. Plummer (Second Class), and S. G. L. Catchlove and F. G. Cowan (Third).

In the Arts Course, besides those mentioned before, F. J. Ward is spoken

well of for his Greek, Latin, and German.

In the Honors Examination F. J. Searle has Second Class Honors in Classics, and J. R. Wilton First Class Honors in Mathematics—a distinction never won before at the Adelaide University since the new and higher courses have been established.

In the Bachelor of Science in the Compulsory Course—Mathematics, J. H. Allen, N. E. Edwards, E. W. Holden, C. W. Hooper, L. M. W. Judell, A. B. Lloyd, and H. T. Phillipps have passed. In Physics L. T. Cowan, E. W. Holden, C. W. Hooper, G. D. Moore, and G. R. West. In Chemistry, A. W. Collins, L. T. Cowan, J. T. Gray, E. W. Holden, C. W. Hooper, A. B. Lloyd, G. D. Moore, and G. R. West. In Biology, H. Basedow, H. E. Pearson, and G. R. West.

In the optional subjects—Pure Mathematics, E. Chapple, N. H. Edwards, G. D. Moore, J. Shaw, and J. R. Wilton. In Applied Mathematics, W. L. Cleland and G. D. Moore. In Applied Mechanics, E. Chapple, B. L. Gardiner, L. M. W. Judell, and A. E. Paton. In Final Physics, E. Chapple. In Chemistry (Part II.), G. R. West. In Geology (Part I.), J. C. Colebatch, B. L. Gardiner, A. E. Paton, H. T. Phillipps, J. Shaw, J. R. Wilton, and N. H. Edwards (II.) In Mineralogy

(Part I.), H. Basedow, B. L. Gardiner, L. M. W. Judell, A. E. Paton, and J. Shaw. In Mineralogy (Part II.), H. Basedow. In Assaying (Practical), B. L. Gardiner, J. M. W. Judell, A. E. Paton, and J. Shaw. In Surveying, E. Chapple, W. L. Cleland, J. C. Colebatch, B. L. Gardiner, L. M. W. Judell, A. E. Paton, H. T. Phillipps, J. Shaw, and J. R. Wilton. In Machine Design, C. W. Hooper and J. Shaw.

In the courses at the School of Mines many old P.A.C.'s have been successful. C. Burgan and W. J. Cowell have secured the Associate Diploma, and R. F. Blaikie, E. N. Goode, E. M. Ingamells, F. E. Parsons, and E. J. N. Fisher have qualified for the Diploma in Metallurgy, but have to do six months' practical work before receiving it.

In the scholarships awarded at the School of Mines this December we note with pleasure the names of A. R. Wight, and J. H. Haycraft. Also E. R. Ingamells is to be congratulated on having secured the highest prize of his year (£30) for Metallurgy, and C. Hawkins the second for Mining, and A. R. Wight for the best first year in Mechanical and Electrical Engineering.

Other successes at this school are:—
J. H. Haycraft—Applied Mechanics (First Class), Advanced Machine Design (First Class), Mechanical Engineering (First Class).

E. W. Ingamells—Advanced Assaying, Advanced Metallurgy, Ore Dressing, Engine Construction (First Class).

F. E. Parsons—Advanced Assaying, Advanced Chemistry (First Class), Advanced Metallurgy, Ore Dressing, Engine Construction (First Class).

E. N. Goode—Advanced Assaying, Advanced Metallurgy, Mineralogy, Ore Dressing, Fitting and Turning, Engine Construction (First Class).

R. F. Blaikie—Volumetric Assaying (First Class), Geology (First Class), Mining, Ore Dressing, Surveying, Engine Construction (First Class).

C. Hawkins—Assaying, Advanced Chemistry, Machine Design (First Class), Mineralogy, Statics, &c., Fitting and Turning, Mechanical Drawing.

L. W. Cooper—Assaying, Advanced Chemistry, Geology, Mineralogy, Mining, Ore Dressing, Surveying, Engine Construction (First Class).

W. R. Wilkinson—Assaying, Advanced Chemistry, Machine Design, Metallurgy, Mineralogy, Fitting and Turning.

E. Sullivan—Assaying, Advanced Chemistry, Mathematics, Building Construction.

E. H. Parsons—Assaying, Advanced Chemistry, Mathematics, Mineralogy, Fitting and Turning.

H. L. Jene—Advanced Chemistry, Metallurgy, Mineralogy (First Class), Solid Geometry, Engine Construction (First Class).

A. R. Wight—Chemistry, Mathematics (First Class), Mechanics (First Class), Physics, Freehand Drawing, Solid Geometry, Mechanical Drawing, Woodwork.

W. M. Temby—Chemistry, Mathematics, Physics, Plane and Solid Geometry.

E. B. Jenson—Machine Design (First Class), Fitting and Turning.

C. W. Matters—Machine Design, Mathematics (First Class).

Dr. L. J. Robertson has been appointed one of the resident medical officers at the Prince Alfred Hospital, Sydney.

The Oval Match.

This eagerly-looked-forward-to fixture began on Saturday, December 13, at noon, the day being rather warm, but suitable for cricket.

Campbell, Saints' captain, won the toss and elected to bat, Reynell accompanying him to the wickets to open the innings. Christoph bowled from the Cathedral end, and off his third ball came a leg-glance to Campbell. Jeffers took the trundling at the river end, Campbell being responsible for a boundary hit off that bowler. Cowan showed to advantage here in the fielding. Some steady play followed, and then off a fast one from Christoph a fine catch

was taken by Homburg in the slips, which gave Reynell his dismissal, after making 3.

1—3—11.

Fotheringham followed, and almost directly was dropped in the slips, but Campbell just after this ended his career by being caught by Bowen off "Jeff," his total being 8.

2—8—11.

Their next man, Duncan, who evidently thought it prudent, batted steadily for some time. After putting a four and some singles to his credit, he had to run for it, on account of some smart fielding by Homburg, but got in. An uppish one over slip's head produced 4 to Fotheringham. Here that same batsman was almost run out owing to Townsend fielding a fast ball at point, but Christoph took a fine left-handed catch from him very soon after, Jefferis being the bowler.

3—7—25.

The next to face the fire for them was McFie, of whose average and scores during the season we had heard so much. After a short pause Duncan was bowled off his pads by "Christy" for 12.

4—12—25.

Stevenson opened by drawing one nicely for 4. Some careful play by McFie and then four successive maidens followed, during which Stevenson seemed uncomfortable. Then some fours and then another interval of slow

cricket, in which Darling showed good fielding form. Hill here relieved Jefferis, and was promptly driven for 3 by Stevenson. Soon after the same batsman had a narrow escape from being given out l.b.w. Fifty appearing on the scoring board was welcomed lustily, and then amidst the uproar McFie played a ball on, off "Solly."

5—7—51.

Bakewell replaced McFie, and was very soon given out l.b.w., having failed to score.

6—0—55.

Smith followed him, and Christoph was exchanged for Townsend at the Cathedral end. Slow play followed, and then came the adjournment for lunch.

After resuming Christoph again bowled. Nothing resulted from the first over, but off "Jeff's" first ball Stevenson was badly missed by Hill at cover, and again had another life by Drew dropping him behind the sticks. Both batsmen, through this and their dinner, became more cheerful, and started hitting out merrily. The "100 up" was soon received with great joy by the Saints' "barrackers." Very shortly Darling missed a difficult chance. The batting became slow, but the interest was soon aroused again by Smith sending one "aloft," after a useful 27, to be held by Steele.

7—27—103.

Two fourers in succession brought

Stevenson to his 50. Up to this point he had had a lucky innings, but he made some fine telling strokes. Jay opened with two boundary hits off Steele. Bowen then replaced Christoph. Steele, who met with no success, soon gave way to Cowan. This part of the game was decidedly the most lively as regards batting. Following a couple of fours, an appeal against Jay for "caught behind" was not upheld. Stevenson, at 81, after an innings interspersed with chances, was caught by Hill off Christoph—of course, unspeakable joy on the part of Princes, but applause from pavilion and field alike for a fine innings. Harvey followed, and was missed directly by Drew, and Jay soon potted one up off Cowan to Bowen, and was dismissed for a helpful 32.

9—32—176.

Toms, the last man, arrived in due course at the crease, and after he had made 2, Harvey was clean bowled by Christoph without scoring.

10—0—179.

P.A.C. INNINGS.

After a short interval Drew and Bowen opened for Princes. Toms bowled for Saints. An uppish hit through slips brought 3 to Bowen, and another leg stroke produced a like number. Drew's beginning was anxiously awaited, and soon came in the form of a single to square leg. Two boundaries followed, and then a lively cut to the Smokers' Pavilion. Four

more boundaries in succession made Drew's score mount up, and kept the fielders on the alert. Shortly a fine ball from Bakewell scattered Bowen's stumps.

1—20—43.

Homburg replaced him, and after a single to Drew began in his unconcerned way by late-cutting Toms for 3. Drew soon after this was missed at slip, which caused a sigh of relief amongst Princes, but Bakewell soon made up for it by bowling him after a useful 31.

Hill followed, and opened well. At this point came a diversion in the pavilion in the form of a "tiff" over the flags, and the prolonged yelling and screeching greatly spoilt the pleasure of many for the time. During this excitement Hill gave a chance at the wicket, but was missed, and again almost immediately. A very neat leg-glance by Homburg brought the score to 100 for the loss of two wickets. Opening his shoulders, Hill hit one straight at McFie, and was badly missed. Owing to Campbell's speed several that would have been boundaries were stopped, but the score mounted up fairly fast. Hill's 50 appeared on the board very soon, after some nice strokes, and was loudly applauded. At this stage Homburg, who had been playing good sound cricket, had 55 to his credit. When 63, off Jay's last ball, he was bowled. Perhaps he was anxious to score the

remaining 5, to catch Saints' total, with one mighty stroke. He gave no chances, and played a fine steady innings, his partnership with Hill being productive of 113 runs.

3-63-173.

SECOND DAY.

On Monday, though the weather was threatening, practically no rain fell, so with a good pitch, 6 runs to catch up to the Blues' first innings score, and seven more wickets to fall, the Reds began their second day's play. Darling's first four brought the score up to his opponents', and his brilliant hitting and the firm defence of Hill reminded one of the pair of the same names who have so often saved the match for their state. At 201, when Hill was 69, a fairly easy catch was missed off Toms. It did not take very long to make Hill the top scorer, but at 99, in excitedly attempting to make his century, a smart bit of fielding sent in the ball before he could regain his crease. Thus was his brilliant innings closed.

4-99-264.

Christoph then followed, but the second ball from Jay completely beat him.

5-0-264.

Cowan then took the bat and followed suit, making Jay's record three for 20.

6-0-264.

Shortly after Townsend entered, Darling was prevented getting the coveted

medal, for Bakewell's leather found its way to the sticks. Darling scarcely gave a chance. His off play was as brilliant as his leg play was weak.

7-47-268.

At this stage, when things were not looking half as bright as a few minutes previously, Holland and Townsend were batting steadily away, knocking up fours, till Toms took his first wicket at the expense of Holland, who tried to pull a straight ball.

8-21-318.

Jefferis entered, but in Toms' same over he was dismissed, making our third "duck."

9-0-318.

Steele then took his place, but he did not get a chance, for Bakewell secured his fourth wicket at the expense of Townsend, who put an easy one up in the slips. He had batted very pluckily, and was the only member of the team who was caught out. The last two wickets fell without any runs being scored.

10-29-318.

SAINTS' SECOND INNINGS.

With a deficiency of 139 runs, Reynell and Campbell went out to face the bowling of Christoph and Jefferis, and together they managed very slowly to pile up 36 runs before the interval.

Shortly after they went out again a smart bit of fielding by Darling dismissed the Captain, run out. It was a

relief to see this partnership broken up, for the play had been dreary in the extreme.

1—21—47.

Stevenson followed, but was soon clean bowled by Hill. We were not sorry to see this sterling batsman go.

2—4—53.

Soon after the entrance of McFie, Reynell, who was playing very steady cricket, was out l.b.w. to Hill, whose bowling average was now two for 9.

3—25—54.

Duncan and McFie were then together. Drew missed a chance of stumping McFie at 5, whilst Steele missed two consecutive catches off Townsend from Duncan. But the latter was hitting them rather high up, and on his attempting to slog Hill, Townsend made a brilliant catch in the deep field. Hill was bowling very well, and had the batsman continually in difficulties.

4—22—94.

After Fotheringham had entered and scored 4 runs, stumps were drawn, making the record four for 98. McFie 19 not out.

THIRD DAY.

The continuation of the match was postponed to 2 o'clock on Tuesday, as the St. Peter's boys had their speech day on the same morning, but the heavy rains that fell about noon put play off altogether for that day,

as the oval was full of small pools of water. Accordingly with four wickets down for 98, and 43 runs to catch up to their opponents' score, the hopeful Blues entered the crease on Wednesday at noon on a damaged wicket. Christoph and Hill were bowling, and before the total was increased Holland caught McFie at square-leg off Hill's bowling.

5—19—98.

Smith and Fotheringham were then together, and brought the score to 100, but no further, for the latter was caught by our wicketkeeper, procuring for Christoph his first wicket.

6—6—100.

Soon after the entrance of Jay, Townsend held the ball in the slips, also from Christoph, and Smith was given out.

7—1—105.

At this stage the game looked certain for us, and almost as certain by an innings. Toms joined Jay, and he was also caught by little "Townie" first ball—the third of Christoph's wickets.

8—0—102.

Bakewell followed, but followed the example of his two predecessors. Townsend therefore caught three men out in succession from Christoph's bowling.

9—2—109.

The last man was Harvey, but his partnership only added 6 more runs, for Christoph clean bowled him. Townsend missed a chance in slips which was given by Toms, and he finished up

11 not out. The Princes were there-
conquerors, and won by an innings and
24 runs.

10—0—115.

Cricket Medals, 1902.

During the year the following boys have made over 50 runs in first-class matches, thereby gaining medals from the Head Master:—

Drew, W. A. V.—

76 not out v. Bankville B.

110 not out v. Harrows.

101 not out v. Bedouins.

70 v. G. & R. Wills.

Homburg, J.—

56 v. Payneham Ramblers.

53 v. G. & R. Wills.

63 v. St. Peter's.

Hill, S.—

52 v. Way College.

99 v. St. Peter's.

Townsend, R. J. B.—

87 v. G. & R. Wills.

98 v. Old Scholars.

Darling, H. G.—

60 not out v. Way College.

Richards, G. W.—

52 v. Bedouin.

Jefferis, A. T.—

63 v. G. & R. Wills.

Cricket.

FIRST ELEVEN MATCHES.

P.A.C. v Waverley.—Waverley, 173; Edmunds 74, Dawson 70. P.A.C., five for 81; Drew 27, Christoph 23 and three for 33; Jeffries four for 59, Cowan three for 26.

P.A.C. v. Payneham Ramblers.—P.A.C., four for 177; Homburg 56, Darling 42, Holland 32, Townsend 30, Jeffries four for 10, Steele two for 7, Christoph two for 11. Ramblers 30.

P.A.C. v. Way College.—P.A.C., 236; Darling 60 not out, Holland 32, Hill 26, Bowen 25; Hill five for 42, Christoph four for 23, Jeffries one for 13. Way, 110; James 31.

P.A.C., v. Bedouin.—Bedouin, 96; Martens 46. P.A.C., five for 111; Richards 52, Bowen 44 not out, Jeffries five for 15, Holland two for 5, Christoph two for 46.

P.A.C. v. Early Closers.—Early Closers, 76 and eight for 159; Plunkett 40. P.A.C., 164; Christoph 25, Darling 22, Homburg 43; Christoph four for 44, Drew four for 17, Hill five for 42.

P.A.C. v. Payneham.—P.A.C., 87; Holland 39, Darling 32; Christoph three for 26, Jeffries three for 23, Hill one for 13. Payneham, seven for 69; Marshall 30 not out. Bad fielding by Princes.

P.A.C. v. Bankville B.—P.A.C., 185; Jeffries 39 and one for 25, Hill 39, Darling 28; Christoph four for 25, Steele one for 8. Bankville, seven for 82; Wilson 32.

P.A.C. v. Christian Brothers.—C.B., three for 46; Hansen 20. P.A.C., three for 134; Drew 65, Townsend 40, Drew two for 1, Hill one for 13.

P.A.C. v. G. & R. Wills.—P.A.C., 326; Drew 70, Jeffries 63 and four for 22, Homburg 53, Hill 49 and one for 29, Bowen 32; Christoph three for 43, Steele two for 23. G. & R. Wills, 135; Harvey 76, Snelling 34.

P.A.C. v. Sturt.—Played on Unley Oval. P.A.C., 139; Bowen 32, Steele 29 not out, Holland 22; Townsend 17 and two for 17, Cowan one for 12, Christoph one for 22. Sturt, seven for 107; Hay 39.

P.A.C. v. Old Scholars.—Played on Norwood Oval. P.A.C., 274; Townsend 98, Steele 40, Holland 24; Jeffries five for 32, Cowan two for 27. Old Scholars, 206; Peacock 69, L. Cowan 39, Raws 27.

SECOND ELEVEN MATCHES.

October 18. P.A.C. II. v. Riversleas.—At Riversleas' grounds. Our captain having won the toss elected to bat. Richards and Claridge made an excellent start, the first wicket falling for 111. We closed our innings with six wickets down for 190; Richards 101 (retired), Claridge 32. Riversleas had three wickets down for 117 at call of time; Fordham 54 (eleven fourers and one fiver), O'Sullivan 16 not out.

October 25. P.A.C. II. v. Wavertons.—Wavertons, five wickets for 227; Hunt 117 retired, Tileman 27, Bennetts 24 not out; Claridge two for 44, Throssell two for 54. P.A.C., seven for 181; Strickland batted well for 79 not out, Richards 29.

November 1. P.A.C. II. v. Way College II.—P.A.C., 195; Strickland 45, Dumas 44, Lowe 42. Way College 25. Lowe bowled seven for 12. Steele three for 8.

November 8. P.A.C. II. v. S.P.S.C. II.—S.P.S.C., 119; Job 31, Giles 33, Lawrence 19; D. M. Steele four for 24, Strickland three for 20, Lowe three for 28. P.A.C., 118, Claridge 41, Dumas 20, Goode 10 not out, Strickland 10.

November 15. P.A.C. II. v. Ovinghams. P.A.C., 184; Claridge 44, Throssell 35, Goode 19. Ovinghams, 33; Townsend five for 9, Hese four for 18. Claridge stumped three and ran out one.

November 22. P.A.C. II. v. Incogniti. P.A.C., 121; Throssell 29, Stoddart 28, Dumas 22. Incogniti, 105; Blackmoore 37, Beresford 21; Strickland three for 32, Stoddart three for 11, Throssell two for 11, Lowe one for 17.

November 29. P.A.C. II. v. Kyre College. P.A.C., 71; Drew 23, Dumas 22; Stapley and Saunders shared the wickets for Kyre College. Kyre College, 110; Stapley 30, Ellis 26 not out; Stoddart five for 22, Richards two for 8, Throssell one for 33.

December 5. P.A.C. II. v. S.P.S.C. II.—P.A.C., six wickets for 208; Claridge batted excellently for 75, Lowe 57, Throssell 24, Drew 16. S.P.S.C., 115; Moyes 36, MacKenzie 20, Giles 20; Throssell five for 21, Stoddart three for 30 (including hat trick), Lowe one for 18, Strickland one for 32. Only seven of our men turned up.

Clarkson	162	6	85	2	42.5

Critique of Team.

Bowen.—A good solid bat, especially fond of cutting; rather a poor defence. Fields at mid-off and pull; slow in the field, but sure.

Cowan.—Bats splendidly at practice, and drives hard. Owing to nervous-

ness and bad luck does not shine in matches. He is the best fine-slip I have seen in a college team, also brilliant at mid-off.

Christoph.—The best bowler in the team, capturing 46 wickets with an average of 11; has improved since he has taken to "off theory." Rather a poor bat; has his good strokes, especially drive; fields well.

Darling.—A good field at point. One of the most consistent scorers in the team; has a strong defence; has a favorite cover hit; is weak on the leg.

Hill.—At times a poor field, owing to laziness, but in big matches he fields well. A dashing bat, with strokes all round the wicket; a bad starter.

Homburg.—A good second slip. His batting is all that can be desired; scores quickly, and has a variety of strokes.

Holland.—A poor field, but works hard to make up. One of the few hitters in the team; scores well; his fate seems to be thirties.

Jefferis.—A fair field. Gets wickets, but is rather expensive. As a bat he has lately developed somewhat; too fond of hooking off the wicket.

Steele.—A fair field. As a bowler lately has failed. A fair bat with a strong defence; is a sticker.

Townsend.—A change bowler. Good third man, and the best long-field man in the team. A dashing bat; scores

best on the turf, owing to his size; rather too fond of trying to lift.

Drew (Captain).—Vigorous and attractive batsman; scores rapidly all round the wicket. Capital wicket-keeper and fair bowler. As captain has been a great success, keeping his team well in hand and setting them an example of tireless energy. A good all-round captain of a good all-round team.

W. H. RAYNER,
Hon. Manager.

Duces.

The duces of the various forms this Christmas were as follows:—

- Head of the School—L. J. Darwin.
- Lower Sixth Form—R. W. Tassie.
- Fifth Form—L. F. Burgess.
- Lower Fifth—C. M. Churchward.
- Upper Fourth—P. M. Fuller.
- Lower Fourth—H. K. Hotham.
- Upper Third—C. E. Radford.
- Lower Third—H. Willsmore.
- Second Form—E. C. Grasby.
- Lower Second—H. G. Holland.
- First Form—H. B. Piper.

Chips.

Cricket Match.

A good win for P.A.C.

University Examinations.

Bennett headed the Senior List.

L. Darwin had a splendid record.

Trüdinger and Fry did well in the exams.

Christoph bowled well in the Oval Match.

What a startling array of "ducks' eggs."

Will the results be so late in coming out next year.

R. Wilton did brilliantly in his Mathematics.

Hard luck for S. Hill that he missed that extra run.

Clem Hill and Kirkwood prominent against Victoria.

Angas Engineering Exhibition again falls to our college.

We wish Mr Langley a pleasant trip to the Old Country.

Burgess was the highest South Australian in the Junior.

A large number of Old Boys obtained degrees this year.

This year to be divided into three school terms instead of four.

It was not a Higher Public candidate who said that Shakespeare wrote "Floradora."

Who will be the first to gain the new Scholarship founded by the Old Scholars' Association.

Question—How many seconds are there in the month of February?

Answer—Two. The second and the twenty-second.

Subscriptions.

Subscriptions have been received from Nock and A. J. M. Sharpe.

P.A.C. Old Collegians' Association.

The first meeting of the new committee was held on December 11, when there was a very good attendance. Three new members were elected. The Secretary reported that the deed of agreement in connection with the Foundation Scholarship was ready for signature. It was resolved that the sum of £200 should be immediately paid over to the College Committee for the purpose of founding a scholarship in perpetuity, and Mr. A. E. Davey was authorised to sign the agreement on behalf of the Association.

The Foundation Scholarship Committee (Messrs. Davey, Colton, and Grasby) met on January 3. The Secretary reported that five nominations had been sent in, and after discussion it was resolved that Philip Thomas Morcombe should be the Foundation Scholar for 1903. He is a son of Mr. T. Y. Morcombe, of the S.A. Railway

Department, and at present attends the Sturt Street School. He will commence his new scholastic duties on the first day of the term.

Members' subscriptions for 1903 are now due, and the Hon. Secretary will be glad to receive them.

H. E. FULLER, Hon. Sec.
Gilbert Chambers,
Gilbert Place.

University Examinations, December, 1902.

HIGHER PUBLIC.

The results of this, the highest examination open to candidates from the schools of South Australia (and indeed some West Australia and a few from Victoria) are exceedingly gratifying this year again to P.A.C.

GENERAL HONOUR LIST.

(The numbers prefixed to the name means place on the list of all successful candidates).

- 1, Darwin, L. J.
- 2, Trüdinger, R.
- 5, Fry, H. K.
- 6, Ellis, F.
- 8, Bowen, H. C.
- 9, Evans, R. S.
- 10, Hanton, H. H.

ANGAS ENGINEERING EXHIBITION

(All that qualified were from P.A.C.)
1, Darwin, L. J.

- 2, Bowen, H. C.
- 3, Hanton, H. H.

SPECIAL HONOUR LIST.

Latin—

- 1, Darwin.

German—

- 1, Darwin.
- 2, Fry.
- 3, Trüdinger.

Physics—

- 2, Trüdinger.

Pure Mathematics—

- 1, Darwin.
- 2, Trüdinger.
- 4, Bowen.

Applied Mathematics—

- 1, Darwin.

Chemistry—

- 1, Hanton.
 - 3, Darwin
 - 3, Fry
- } equal.

PASS LIST.

H. C. Bowen, Lat., Math. (credit),
Physics, Chem.

W. Christoph, Physics, Chem.

D. R. Cowan, Lat., Fr., Physics,
Chem.

L. J. Darwin, Lat., Ger., Math.
(Pure and Applied). Chem. (all with
credit).

W. A. V. Drew, Physics, Chem.,
Geology.

F. Ellis, Greek, Lat., Math., Physics,
Chem.

R. S. Evans, Lat., Ger., Math.,
Physics, Chem.

H. Flecker, Ger.

P. A. Fraser, Chem.

H. K. Fry, Lat., Ger. (credit), Math.,
Physics, Chem. (credit).

H. H. Hanton, Math. Pure and Ap-
plied, Physics, Chem. (credit).

V. H. Hese, Ger., Chem.

H. E. Hill, Ger.

R. Trüdinger, Greek, Lat., Ger.,
Math., and Physics (credit for the last
three).

J. S. West, Ger., Math., Physics.

—

SENIOR PUBLIC.

I. GENERAL HONOURS LIST.

1 denotes English Literature; 2,
History; 3, Greek; 4, Latin; 5, French;
6, German; 7, Arithmetic and Algebra;
8, Geometry; 9, Trigonometry; 10,
Physics; 11, Chemistry. An asterisk
denotes credit.

1, F. N. Bennett (First Prize), 4*,
6*, 7*, 8*, 9*, 10*, 11*, (credits in all).

4, R. W. Tassie, 4*, 6*, 7*, 8, 9, 10*,
11*.

7, S. L. Corry, 1, 4, 6*, 7*, 8*, 9, 11*.
10, W. B. Angwin, 4, 6*, 7, 8, 9, 10*,
11*.

11, A. H. Bell, 1, 4*, 6*, 7*, 8, 11.

15, O. Rischbieth, 4, 6*, 7, 8, 10, 11.

17, O. L. Isaachsen, 4, 6*, 7, 8, 10,
11*.

17, A. W. Smith, 4, 6, 7, 8*, 10, 11.
21, W. R. Birks, 4, 6, 7, 8, 9, 10, 11.
24, R. Asher, 1, 4, 6, 7, 8, 11.
25, R. J. Verco, 1, 4, 6*, 7, 8, 11.
25, C. V. Webber, 4, 6, 7, 8, 9*, 10,
11*.
29, M. Erichsen, 1, 4, 6*, 7, 8, 11.

II. SPECIAL HONOUR LIST.

English Literature—

3, W. H. Rayner.

History—

1, W. H. Rayner.

Latin—

1, F. N. Bennett.

3, { A. H. Bell
R. W. Tassie } equal.

Arithmetic and Algebra—

3, R. A. Goode.

4, F. N. Bennett.

6, S. L. Corry.

10, R. W. Tassie.

23, A. H. Bell.

Geometry—

6, S. L. Corry.

7, F. N. Bennett.

7, A. W. Smith.

15, W. Ingleton.

21, R. J. Dumas.

Physics—

1, F. N. Bennett.

1, R. W. Tassie.

4, R. J. Dumas.

8, W. B. Angwin.

8, A. T. Jefferis.

German—

- 3, W. D. Rosengarten.
 4, F. N. Bennett.
 4, O. Rischbieth.
 4, R. W. Tassie (equal).
 7, A. H. Bell.
 7, R. J. Verco (equal).
 9, M. Erichsen.
 10, H. Flecker.
 15, O. L. Isaachsen.
 15, J. Homburg.
 18, S. L. Corry.
 20, W. B. Angwin.

Trigonometry—

- 4, F. N. Bennett.
 4, C. V. Webber.

Inorganic Chemistry—

- 1, R. W. Tassie.
 2, W. B. Angwin.
 2, O. L. Isaachsen.
 2, A. C. Richards.
 6, F. N. Bennett.
 7, S. L. Corry.
 7, W. H. Lang.
 7, C. V. Webber.

PASS LIST (IN ADDITION TO THOSE IN HONOURS).

- R. J. Dumas, 4, 7, 8^{*}, 10^{*}, 11.
 H. Flecker, 1, 4, 6^{*}, 7, 8, 9, 11.
 R. A. Goode, 1, 4, 5, 7^{*}, 8, 11.
 W. C. Holland, 1, 2, 4, 7, 8.
 J. Homburg, 1, 4, 6^{*}, 8, 11.
 A. T. Jefferis, 4, 6, 7, 8, 10^{*}, 11.
 L. W. Jeffries, 1, 5, 7, 8, 11.
 W. H. Lang, 2, 8, 9, 10, 11^{*}.

- W. E. Preece, 1, 4, 6, 7, 11.
 A. C. Richards, 1, 4, 6, 7, 8, 11^{*}.
 G. W. Richards, 1, 4, 6, 7, 8, 11.
 W. R. Rogers, 1, 4, 7, 8, 11.
 W. D. Rosengarten, 4, 6^{*}, 7, 8, 9, 11.
 C. Viner Smith, 1, 4, 6, 7, 8, 11.
 R. Trimmer, 1, 2, 4, 7, 8, 9.
 A. G. Trott, 1, 4, 5, 7, 8, 11.

That is, thirty in all passed this examination, thirteen of them gaining honours.

JUNIOR PUBLIC.

GENERAL HONOURS LIST.

1 denotes English Literature; 2, History; 3, Geography; 4, Greek; 5, Latin; 6, French; 7, German; 8, Arithmetic; 9, Algebra; 10, Geometry; 12, Chemistry.

3, L. F. Burgess, (Third Prize), 1*, 4, 5^{*}, 8^{*}, 9^{*}, 10^{*}, 12.

6, E. R. H. Darwin, 1, 5, 7, 8^{*}, 9, 10, 12^{*}.

15, J. L. Glasson, 1, 5^{*}, 8^{*}, 9^{*}, 10^{*}, 12.

35, R. H. Leggoe, 1, 2, 5, 8^{*}, 9^{*}, 10, 12^{*}.

40, L. W. McNamara, 1, 5, 7, 8, 9, 10^{*}, 12.

SPECIAL HONOUR LIST.

English Literature—

- G. D. Cowan, Tennyson Medal.
 3, L. F. Burgess.

Latin—

- 5, J. L. Rossiter.
8, L. F. Burgess.
8, J. L. Glasson.

Arithmetic—

- 1, H. M. Hardy.
15, J. L. Glasson.
15, H. W. D. Stoddart.
23, E. R. H. Darwin.
24, L. F. Burgess.
28, R. H. Leggoe.

Algebra—

- 1, L. F. Burgess.
1, J. L. Glasson.
46, R. H. Leggoe.

Geometry—

- 1, L. F. Burgess.
15, L. W. McNamara.
20, J. L. Glasson.

Chemistry—

- 1, E. R. H. Darwin.
3, R. H. Leggoe.
5, E. B. Thomas.

PASS LIST (IN ADDITION TO THOSE IN HONOURS).

- A. N. Birks, 3, 5, 7, 8, 9, 10, 12.
J. W. Blacket, 5, 8, 9, 10, 12.
G. D. Cowan, 1* (Tennyson Medal),
5, 6, 10, 12.
A. A. Darke, 5, 7, 8, 9, 10, 12.
H. M. Hardy, 5, 7, 8*, 9, 10, 12.
C. A. Hudson, 1, 2, 8, 10, 12.
S. H. Jackman, 1, 2, 5, 7, 8, 9,
10, 12.

J. L. Rossiter, 1, 5*, 8, 9, 10, 12.

H. E. Rowe, 1, 8, 9, 10, 12.

E. A. H. Russell, 1, 5, 7, 8, 9, 10, 12.

J. T. G. Short, 1, 5, 7, 8, 9.

B. Simpson, 1, 8, 9, 10, 12.

Medical Course.

The boys who wish to enter upon the study of Medicine will have a little more to do for the future. The General Medical Council has decreed that henceforth the subject named English shall be taken to include not only Literature as hitherto, but History and Geography up to the Senior Standard as well. It was feared that those who qualified this December in the other subjects would have to go up in History and Geography this March, but this disaster has been obviated.

Christian Union.

The end of the year calls for a review of the work that has been undertaken during its course, and we cannot but feel intensely thankful for the success which has been granted to our efforts. Not only have the attendances at the meetings been very encouraging, but

the whole work of the Union has been undertaken very cheerfully and willingly. To those of our number who at this time leave us to enter upon their several spheres of usefulness, in the name of the Union we wish "God speed," and express a fervent hope that they may in all their lives seek first the Kingdom of God and His righteousness.

Hospital Doctors.

Dr. G. A. Fischer has been appointed a member of the honorary

staff of the Adelaide Hospital, his special department being diseases of the ear and Throat.

Dr. F. J. Chapple who has been for the last two years in charge of the Rockhampton Hospital, Queensland, has been granted six weeks' furlough, and may be expected to pay a visit to South Australia early in March.

B. von Bertouch writes from Wiesbaden and sends kindly remembrances to P.A.C. and all his friends.
