UBI NON EST SCIENTIA ANIMÆ NON EST BONUM.

VOL. V.—No. 96.

ADELAIDE, JANUARY, 1910.

[PRICE SIXPENCE.]

School Notes.

The forty-first Speech Day passed off splendidly. His Excellency, Sir Day Hort Bosanquet, presided, and took most manifest interest in all the proceedings. He spoke some stirring words which will long last in our memories.

His Excellency the Governor, who was received by the boys standing and cheering, said it gave him great pleasure to distribute the prizes and trophies. He congratulated the Head Master and the teaching staff upon the long list of honors won by the scholars, and was impressed by the remarkable ramifications, extending throughout the globe, of the boys who had passed through the College. The academic successes gained at distant places of learning showed how far-reaching was the influence of Prince Alfred College as one of the great Public Schools of the Empire. As an instance of the high positions gained by the pupils of the College he would mention the remarkable career of Acting-Professor Priest, at the University of Adelaide. Mr. Priest's career should be an exam-

ple for other scholars to emulate. He surmounted tremendous difficulties in the course of his education, and as owing to financial reasons his family were unable to assist him, Mr. Priest achieved his brilliant career by means of exhibitions and other honors which he won for himself. One very homely passage from Sir Day's own career we should like to quote verbatim. "When I passed for midshipman," the Governor remarked, "the senior captain of the board who examined me called me up and said, 'Look here, youngster, I believe you are trying to do the best you can to get on. I will give you a bit of advice. Make a resolution, and stick to it, that, whenever you go on the upper deck, before you come down you will learn something that you did not know before.' I endeavoured to act upon that advice, and made the resolution. I found it very difficult at first, because I imagined there was nothing I did not know. Soon, however, I became aware how ignorant I was, and from that day to this I attribute any small reputation I may have achieved as a seaman and an officer to the fact that I endeavoured to act on the advice

of that old captain who examined me for midshipman." His Excellency added that they did not all have to go on the upper deck, but in their daily walks of life each one of them could, if he chose, learn many things which would be of use in making a true man of him. His Excellency wished to congratulate the College on its success in sport. Although the inter-collegiate cricket match this year was won by St. Peter's College, P.A.C. had been victorious in 15 out of the 31 matches which had been played. Since the establishment of the inter-collegiate shield 7 of the 15 contests had been won by P.A.C., so they had only to "buck up" next year to get even with their rivals. The inter-collegiate football match was splendidly contested, and it gave him a great deal of pleasure to watch it. The passing was excellent, and he admired the sportsmanlike manner in which the game was played by both sides. He congratulated the College cadets on their appearance on parade, and upon their rifle practice. South Australia might well be proud of the successes of P.A.C. To the older boys, who were now leaving, he wished every success in their future careers. They had done good work for their College, and under the direction of the Head Master and his staff the good tone and good form prevailing in the School was due to their efforts. To the College generally he extended his best wishes

for its continued success, and the preservation of its best traditions of manliness and honor. He hoped that the boys and masters would have a merry Christmas and a happy new year. (Loud cheers).

The Town Hall was well filled by our friends and old scholars, and all went off capitably. The school orchestra aided in the opening hymn and kept the pitch up admirably. They also rendered two violin studies, and considering that some of the executants had not touched a violin before the beginning of the year, it was a most creditable performance and thanks are due to Mr Grigg for skilful and diligent teaching. Botten did very well indeed on the pianoforte, both as a soloist and with Southwood in a duet. The recitations, too, were good, especially those of the prize-winners—Dunstan for the juniors, and R. S. Davey for the seniors. The whole programme was:—

His Excellency, Sir Day Hort Bosanquet, G.C.V.O., K.C.B., entered.

The School sang the National Anthem.

Hymn, "Summer Suns are Glowing"—The School.

Prayer, The Hon. the President (Rev. W. G. Clarke).

Part songs, "The Anchor's Weighed" (*Braham*); "The Fishermen" (*Gabussi*)—Singing Class.

Pianoforte Solo, "Etude Mignonne"

(*Edward Schmitt*, Op. 16, No. 1)—
Herbert W. Botten.

Recitations, "Horatius" (*Macaulay*)
—G. R. Dunstan and R. A. Davey;
"Henry V. at Agincourt" (*Shakespeare*)
—L. W. Trott and C. A. Shepherd;
"Field of Waterloo" (*Byron*)—R. E.
DeGaris.

Violin Studies, "Simple Aveu"
(*Thome* Op. 25); "Frühlingslied"
(*Mendelssohn*) — The School Or-
chestra.

"Merchant of Venice" Act 1, scene
3 (*Shakespeare*)—R. S. Davey (Shylock),
T. E. Cleland (Bassanio), A. H.
Virgint (Antonio).

Pianoforte Duet, "Zigeunerisch"
(*Poldini*)—Herbert W. Botten and
Albert R. Southwood.

The Captain of Cricket Eleven read
results of sports contests.

The Head Master presented the
honors and prizes lists, and read his
report for the year.

His Excellency the Governor deliver-
ed an address.

His Excellency presented the prizes
and scholarships.

The President moved and the Hon.
Alfred Catt seconded a vote of thanks
to His Excellency.

The humbler exhibits—the draw-
ings and paintings, the woodwork of the
carpentering class, the copy books, and
exercise books were worthy of praise
too.

From the Head Master's annual re-

port we extract a paragraph:—An im-
portant change in the staff takes place,
due to the resignation of Herr Drews,
who for 31 years has taught German to
many generations of boys with signal
success. Boys past and present took
an opportunity last Tuesday at "as-
sembly" to say words of farewell, and
to present a tangible token of their
regard.

Mr. Bayly, who has taught with us
since 1883, for the last four years as
second master, has been granted leave
of absence for the first two terms of
next year that he may visit the older
lands. We trust to receive him back
to our ranks at the end of that period,
having greatly enjoyed his trip, and
having received great benefit from it,
making him still more efficient for his
responsible duties. [Since this was
uttered we learn that Mr. Bayly has
been appointed Head Master of Geelong
College.]

We are glad that another old P.A.C.,
Mr. J. F. Ward, master of arts with
first-class honors in classics, once a
master with us, and for the last few
years second master of the Rockhamp-
ton Grammar School, has consented to
supply the vacancy.

We share a little at least in the sor-
row felt at Geelong College at the sud-
den and utterly unexpected death of
their principal, Mr. C. Norman Mor-
rison. It seems but yesterday that he

was over here with his vigorous team of footballers; he himself the most vigorous of the party. Tall, military-looking, alert, keen, enjoying every moment of his life and arduous duties to the full. Kind, thoughtful, tender, and true—the son of Dr. George, and nephew of Dr. Alex. Morrison, who had guided the destinies of two great Scotch Colleges in Victoria, with such service and loyalty to the Presbyterian Church, and with such conspicuous success, for close on fifty years—inheriting their best schoolmaster qualities and ideals, it seemed as if many years of usefulness lay before him. But it was not to be. What we call an accident occurred—something caught a trigger—and the church, the school, the educational world of Australia, were thrown into deep mourning. With his aged mother, his sisters, and the school we deeply sympathise.

At the Final Assembly held in the Big Schoolroom there were three unusual and interesting incidents. First the Head Master read extracts from a letter he had just received from Sir George Le Hunte, our late Governor, now administering Trinidad. The portions read were Sir George's messages to ourselves. "The ties of friendship between the Princes and me are much too firm to be loosened or weakened by mere geographical incidents. . . I hope this will reach you in time for your

Prize Day to wish you all a very happy Christmas and New Year. I congratulate you on still keeping the football cup, though I shall also congratulate the "Saints" when they get it back again, which they won't do without a big fight for it. . . . Your boys may like to know that I am still encouraging bowling with the little silver cups for each of the two schools here. . . Please give my kindest remembrances to your staff and the School. I hope the cadets are doing well. We are just starting a corps here in each of the schools. Best love to you all." Needless to say the messages were hailed with loud and hearty cheers.

Then came the last speech from Herr Drews, the German Master for 31 years. The Head Master said words of thanks for diligent and successful work, 31 years and rarely absent, never late. Many honours won by his pupils at examinations, many finding practical benefit from his skilled instruction in after life, in reading and in travelling. Then came a presentation of many volumes, complete sets of Gibbon, Scott, and Ruskin. The "old boys," at the instance of Mr. A. W. Piper, had subscribed towards this gift. Mr. Piper was unable to be present upon this occasion, though he quite hoped to do so. Mr. J. R. Robertson, as a member of the "old boys'" Committee, expressed the thanks and good wishes of the "past" generations, and Correll of

the "present." Herr Drews feelingly replied with reminiscences.

Then to Mr. Bayly, who was believed to be starting for a trip round the world, kindly words were spoken by Correll, and a Gladstone, military brushes, rug, etc., were given. Mr. Bayly acknowledged the same, and said how much he loved his work and his old school; but he wanted to see the greater world and learn from it. He hoped to return better fitted for the work to which he had devoted his life.

At the invitation of the Mayor and Corporation of the Town of Norwood, in which our School is situated, many members of our gymnastic classes lent a hand at a grand Charity Fete for the poor of the District. His Excellency the Governor opened the fete and said some kind and complimentary words as to our display. The financial proceeds of the fete were considered very satisfactory, and the Council sent a kind letter appreciating our assistance.

The Head Master's medals have not been won so freely this year, but the two Steeles have qualified five times each—Don Steele for his 122 against West Torrens West; 102 not out v Linden Park; 60 v University; 82 v Old Scholars and 56 v Saints. Ken. Steele scored 90 not out v Glenelg B; 59 v the same. He bowled 3 wickets of the Port Adelaides in one over, and

scored 50 v Linden Park and 52 v the Varsity. L. T. Cowan won one medal for 51 against Linden Park, and E. P. Howard one for the hat trick against Saints.

A new Speech Room has just been given to Rugby School by old boys. It cost £14,000, and was opened by His Majesty the King. It is adorned with a statue of Dr. Arnold. It is cruciform in plan, in the window of one transept there is a stained glass window in honor of Dr. Arnold, and in the other one to Lawrence Sheriffe, the pious founder. This worthy grocer of Queen Elizabeth's day, gave a piece of land, built a school house, and left property in London, then bringing in about £7 a year. Now the endowment is worth as many thousands per annum, and with the fees of £200 for each of nearly 800 pupils, makes the school strong enough to give the best possible education, and still it keeps before it the great principle defined by Dr. Arnold—"First religious and moral principles; secondly, gentlemanly conduct; and thirdly, intellectual ability."

In reply to the address of the school King Edward said: "Rugby is notable, not only for its successes in scholarships, not only for its men of letters, but even more for its high ideals of honor and manliness and public spirit, and all those qualities that make our public schools the finest places of edu-

cation in the world. These ideals and these qualities strenuously taught by her great leaders, and handed on as a cherished tradition from generation to generation of her sons, have left the mark of Rugby deep, not only throughout these islands, but throughout the Empire and in every part of the world. Carry with you these traditions when you who now listen to me are scattered, as scattered as you will be in a few years time, far and wide, and wherever your lot may be cast see that you uphold the great name of your school, and prove yourselves worthy of those who have gone before you. Remember that to do this you must take advantage of the wealth of opportunities offered you here, in school and out of school, opportunities of developing both mind and body, such as you will never have in the same abundance."

Melbourne Grammar Old Boys are raising a jubilee fund to endow their Alma Mater. It has reached £4,000.

The Rev. Dr. George Brown, who has done such splendid pioneer missionary work in Samoa, New Britain, New Ireland, and the Solomon Islands, paid us a visit on November 2nd, and addressed the Assembly. It was a great treat to listen to his brave true words, and to feel that one was learning from a real hero. So modest withal, as he told of the triumphs of Bible truth, evidently in no small part due to his

own wise and faithful efforts, in the dark places of the earth. There was a touch of humour, that made all be remembered better, and a note of truth and sincerity that told how he loved his dark-skinned brothers, amongst whom he had labored so long, ennobled by peal of thanksgiving as he rejoiced in the victories of the cross and its mighty lessons, and as he exclaimed, "What hath God wrought?"

At the close the reverend doctor handed to the Head Master a copy of his autobiography, presented to the School library by the thoughtful kindness of His Honor Sir Samuel Way.

The Government have for many years offered three University Scholarships, tenable at the Adelaide University. These were originally worth £50 a year for three years. In 1894 the value was reduced to an average of £30. Another change has now been made, there are to be ten offered to hold for four years, and to be worth £25 a year, and to be tenable at the University, or the School of Mines, or at Roseworthy Agricultural College. Five of these are restricted to the High School, but the other five are open to all. We know how large a proportion of these P.A.C.'s have won in past years. We hope that our good record will be maintained, or even surpassed.

Mr. Lawton, the travelling Secretary

of the University Christian Union gave a most interesting talk at assembly one morning in October. He told of the origin and purpose of the movement, and spoke of its present increasing and rapid development. He traced it to the Y.M.C.A., commenced by Sir George Williams 65 years ago, and then through its specialisation in America. Its numbers now total 140,000, and include the leading young men of Universities and Colleges. His address seemed to place the Union on a broader plane than some of us had thought of it.

J. M. Davis, who won a gold medal for making the biggest score in his battalion, was chosen as a member of the team of seven cadets that fired a match against the visiting American boys. The S.A.'s won. Davis made fourth score for the victorious S.A. team.

Aurora Australis on Saturday night, September 25th; what a magnificent display it was! First noticed soon after 10 p.m., a rosy light in the south-east, and a deep arch of greyish purple. This had been seen before; but the new feature was furnished by the misty clouds, greenish white and glowing, the moon shining brightly, but not dimming them. A strong east wind was blowing, and at first it seemed as if light, soft, filmy clouds were rising from the eastern hills to form patches like

nebulae in the sky. Lace like fragments of gauzy curtains, bright and light like that of a vacuum tube, but yet such that stars could be seen clearly through them. These swept off westward, twisting, turning, rolling up and opening again, as they flew across the sky. Then to disappear and to be followed by others of equal mystery and like power to awaken awe. Anon from the arch in the south darted up beams of saffron light, spreading fanlike, and reaching almost to the zenith, flickering, fantastical, mocking description and almost realization, waxing and waning. How weird it all was, but worth a long night's watch to see, and long to be remembered.

The service held early in the term on the Parade Ground in memory of the South Australians who fell in the war in South Africa, 1899-1902, was a solemn event. About eighty of our cadets took part in it and did "honour to the brave" who fought and kept the empire ours, and honor to their School by representing us upon this great occasion. To only one name in the long list on the tablet in our big schoolroom is the mournful word "obit" affixed, and we honor no less those who were mercifully spared; they offered themselves willingly and returned, having done their duty and helped to keep our empire unencroached upon. We cannot tell what defeat in South Africa might

have meant, the outlook was very ominous at one time; but Britain's integrity was preserved, partly by the help of her loyal sons over the seas—preserved that she might still bless the world with good government and spread true Christianity.

A great honor has been done to P.A.C. by the selection of Mr. W. R. Bayly, B.A., B.Sc., to be Head Master of the Geelong College, in succession to the late lamented and highly esteemed Mr. C. Norman Morrison, M.A.

At the last assembly held in the big classroom this year, we took the opportunity of wishing Mr. Bayly bon voyage, as he had applied for, and been granted leave for two terms of next year, that he might visit Europe and America, and we quite expected to see him back in his old seat early in September. We noticed his absence from the platform on Speech Day, and whispers went round that he was away in Victoria interviewing the Geelong College Governors, and they have turned out to be true. We congratulate Geelong on securing his services, though we shall miss him much, and especially will the Old Collegians' Association, to which we all hope to belong soon. As a scholar and master from January, 1880, till now, Mr. Bayly has become quite an identity, and masters and boys will continue to

have grateful memories, and to wish him every success in his new sphere.

Mr. C. R. Wilton kindly presented the School with several valuable specimens of carnotite, a radioactive mineral found near Olary. Our thanks are due to Mr. Wilton for this interesting addition to the School Museum.

Mr. Weigall, the Head Master of the Sydney Grammar School, was appointed to his important office in 1866. He has just returned from a year's furlough in Great Britain. Mr. Wade, the Premier and Attorney-General of N.S.W., an old Sydney Grammar boy, has made such representations to the British Government that Mr. Weigall has been created a C.M.C., truly a unique distinction for a schoolmaster. We heartily congratulate the School and its Head.

We congratulate P. E. Correll on winning the Angas Engineering Exhibition. (This makes our score 18 out of the 20 that have been awarded).

Also F. L. Wall, D. L. Barlow, G. S. Reed, and E. G. Stephens on qualifying for a Government Bursary.

We also congratulate J. A. Love on winning the Tennyson medal for English Literature in the Senior Examination. The gaining of this distinction will be peculiarly gratifying to the

Head Master as he takes the classes in this subject.

R. C. Williamson has won the Senior Commercial Scholarship for being top of that list. This has only been awarded twice. Baseby had it last year, now Williamson this. Keep it up P.A.C. Ours are the only boys that passed the Senior Commercial.

Captain Ken. Steele read his report : —“ This year only one of the four Intercollegiate contests was won by P.A.C. St. Peter's won the tennis, running and cricket, while we once more retain the Tennyson football cup. The tennis was played in April, St. Peter's winning by 10 rubbers to 5, or 163 games to 145. Thus, though a comparison of rubbers indicates a rather easy victory for our opponents, the fact that there was only a difference of 18 games proves that the two teams were really very evenly matched. D. Steele proved himself to be intercollegiate champion by defeating Abbott, the St. Peter's first representative, and in all their doubles he and his partner, Davey, secured a win for us. Our football eighteen had a very successful season. Total matches played, 13 ; won 7, and lost 6. The Intercollegiate match, as usual, created great interest, and resulted in an easy win for us, the scores being 5 goals 11 behinds, to 2 goals 4 behinds. The team thoroughly deserved the win, as every member had

turned out to practice with regularity and enthusiasm, and if their example is emulated by others in all varieties of athletics our future success is assured.

Once more we had to acknowledge the superiority of our opponents in the Intercollegiate Running, St. Peter's obtaining an easy win, securing 66 points to our 24. I. Pender. H. M. Charlick, and G. Peters did good work for us. This year our boys trained enthusiastically and we trust that next year our men will make every effort to wrest from our rivals the cup, which has now so long been in their possession. To accomplish this it will be necessary for every runner and jumper to start practising early. We are indebted to Mr. J. W. Blackett for the untiring energy he displayed in inducing boys to train. At the end of the first term our cricket eleven completed its programme of matches for season 1908-9, obtaining ninth position in the B grade. The complete record was as follows :—played 10, won 4, lost 5, drawn 1. This season to date we have played 5, won 3, lost 2. From our point of view the result of the Intercollegiate match was, of course dissappointing, but we heartily congratulate St. Peter's on their excellent win. Last year we complimented a St. Peter's boy on performing the hat trick, and this year we congratulate E. P. Howard on accomplishing the same feat. D. Steele was top scorer for us in each innings, his 56 being the result

of particularly good batting. Willcox and Sullivan contributed an invaluable 45 and 40 respectively. Although this year we have only won one Inter-collegiate contest we are by no means discouraged. As usual all the contests have been fought in characteristically sportsmanlike spirit, and we sincerely tender our congratulations to St. Peter's on winning three of the four challenge trophies. Our second and third elevens have had a very successful season, the seconds only losing two matches and the thirds one. Once again our best thanks are due to our Head Master, our sports master, Mr. Grey, and the rest of the staff for the interest they have shown in the welfare of the various teams.

[The one defect in the above report is that Ken. Steele could not mention how large a part he has played himself as captain, both of football and cricket, and as hon. sec. to the teams.—ED.]

The boarders heartily congratulate their worthy R. S. G. MacLennan on his success in recent examinations. He came easily first in an examination which the Australian Mutual Provident Society hold for the purpose of choosing efficient clerks for their service. This is quite a praiseworthy accomplishment, as among the many unsuccessful candidates we notice several St. Peter's boys, and others from leading Adelaide schools. We wish MacLennan

every success and trust that he will keep up the reputation for excellence of the School and boarding house.

Commercial Fifth—Third Term, 1909.

We have to report the loss of one of our number this term, Eric Williams, who did not return on account of illness, and so decreased our total to fifteen. The form joins in congratulating our esteemed friend Howard on coming top of the Form for 1909, and also the other members who gained prizes on Speech Day. The wooden spoon goes this term to Chas. Willcox.

The form had four members of the first Eleven, namely, C. A. Willcox, E. P. Howard, A. G. Ward, and E. L. P. Goddard. We tender our heartiest congratulations to Howard for obtaining the "hat trick" against Saints and making 29 runs, also to Charlie Willcox for his two creditable scores of 45 and 19, and for his good wicket-keeping.

In the recent drawing examinations our Form did exceedingly well, and A. G. Ward's "excellent" in the Second Grade Model stands out as a creditable piece of work. We notice by the Speech Day programme that Boxer received a prize for painting, and "Parkin" Goddard one for drawing.

The Commercial Fifth mouse catching club has been disjoined on account of scarcity of "bait" and mice.

We hear from good authority that Mr. Bayly has gone to Melbourne in

order to apply for the position of head master at Geelong College. Although we should be sorry to lose the services of such an admirable master at P.A.C., we wish him every success in everything he undertakes to do.

The Form must congratulate "Boxer" Ward on gaining the boarders' medal for gymnastics.

We should be very much obliged if suggestions could be made for preventing our class room being made a thoroughfare for anyone that cares to pass through, as such interruptions are apt to disturb the members of our Form. Boys seem to look upon our room as a short cut to the big School hall and other rooms.

Middle Fourth.

At the end of last term the Primary Examination was held, and six of our boys were successful, viz., Lewis, Hoad, Mitton, Langsford, Downing, and Maughan. We heartily congratulate them on their success.

This form has been very unfortunate in regard to measles, as Hoad, Roach, and Marshman have enjoyed a compulsory holiday, and as they were boarders they had to be sent to "Quambi" Hospital at North Adelaide, where they had a good time and then had a week's holiday at the Semaphore.

The cadets of this Form have been very successful in obtaining stripes. We have one Corporal, Langsford; and

four Lance-Corporals, Newbold, Kelly, R. F. Nicholls, and Roach.

We also have some good cricketers. Roach is second emergency for the first eleven, and Marshman wicket-keeper of the seconds; Green is captain, and Kelly, L. J. Nicholls, and R. F. Nicholls are all prominent men in the thirds.

C. R. Jauncey has left us, having gone on a trip to England to complete his education. We are exceedingly sorry to miss his ingenuous witticisms. He has now left the wooden spoon to his friend Hawkes.

There were some drawing examinations held at the College by Mr. Gill, and the following boys passed: Heinrich, Marshman, Stanley, and Rigby. Some examinations for drawing were held in June, and the papers had to be sent to England to be examined. The following obtained passes: Heinrich 6, Newbold 3, Hoad 3, L. J. Nicholls 2, R. F. Nicholls 2, Rigby 2, Lang 1.

We congratulate Roach on obtaining the Form medal for gymnastics, and also Newbold for obtaining the position of dux of the Form.

Upper Third.

Our form has generally made good solid progress throughout the year, and the results of some of the exams have been very creditable, eight of our number having gained the three certificates. In arithmetic Stan, Brown has made a

name for himself by scoring 99 out of a possible 100. In the recent drawing exams we mention Otto Kennett's success in gaining the highest honor in the First Grade Freehand and Model. Out of sixteen entries from the form fourteen successes are recorded, so we confidently assert that we have among us the artists of the rising generation, not to mention the wonderful productions of our Dutchman during drawing period. We also have to chronicle that we are law-abiding and peaceful members of the community, and do not aspire to "Milingtary" honors, since we have but one stripe in the form, and only one, R. L. Williams, who strove to uphold our honor as a marksman in the Empire Match. In cricket Navvie's initiation into the Thirds was marked by loud applause as he proudly marched forth in borrowed togs to wield the willow. First ball—one herculean effort and the ball finds its way among the Firsts for four, but alas, the second—for great was the fall thereof—timber. K. Mc Ewin has proved himself superior in the Gymnasium and gains the medal. For the last fortnight we have had a lot of Lower Thirds invading our territory while our wielders of the brush and pencil have been busily engaged portraying the beauties of nature, and our warblers—our Thorn has proved a veritable one in the flesh to the others—pouring forth harmonious strain with their sweet young voices. Len. Trott,

Ralph DeGaris and Redney Shepherd were selected to recite on Speech Day (we do sincerely hope that they will hold their audiences spell-bound.) We are pleased to record that Marchant has carried off the much coveted honor, the first position in the class, and that our never weary old friend, Dick, still retains the wooden spoon, and has earned the name of Dreadnaught. We fail to understand why certain Lower Fourth's spend so much time at their ablutions every afternoon, in the lavatory adjoining our class-room. They distract our minds from our much-loved subject, English, and judging from the length of time taken, they must be—we leave them to fill in the blank.

From the recent finals we cull a few historical facts:—Titus Oates was a parsing—with apologies to the Grecian occupants of our room, first period—that 100,000 soles perished during the Great Plague and that silence rained everywhere; that the South Sea Bubble was nothing but a have; and that the Duke of Buckingham was an M.P. who fought many sea fights for Elizabeth, protested against shipmoney, and was executed by James II.

We all wish our form master a Merry Christmas and Happy New Year, and a better class than has just passed through his care (a thing we, however, believe impossible.)

Lower Third.

We must first congratulate the boarders of the Lower Third on all obtaining a prize, especially Ford on being top of the Form. Four of the five boarders were in the first quarter of the class. After having to sing off many times M. Snow obtained the singing prize. Mr. Brackett, our master, also appreciated the way in which the boys did in the final examinations. Kleinig, the neatest boy in the Form, passed in the drawing examination.

A small amount was collected in our Form towards the gift to Mr. Bayly before departing on his tour round the world.

A. G. Arthur, our brilliant violinist, took part in the orchestra on Speech Day.

We congratulate ourselves upon having two members of our Form, Noble and Phillips, in the teams which represented our School in the Empire Shooting Contest.

HIGHER PUBLIC EXAMINATION.

A.—General Honour List—

- 5, F. L. Wall.
- 7, P. E. Correll.
- 13, D. L. Barlow.
- 19, G. S. Reed.
- Angas Engineering Exhibition—P. E. Correll.
- University Scholarship — G. S. Reed.

B.—Special Honour List—

- Latin—2, F. L. Wall.
- Applied Mathematics—1, R. L. Davidson.
- Physics—1, D. L. Barlow.
- Chemistry—3, P. E. Correll; 5, F. L. Wall; 7, D. L. Barlow.

C.—Pass List—

[1, English Literature; 2, History; 3, Greek; 4, Latin; 5, French; 6, German; 7, Pure Mathematics; 8, Applied Mathematics; 9, Physics; 10, Inorganic Chemistry.]

D. L. Barlow, 4, 6, 7, 9*, 10*.

P. E. Correll, 4, 6, 7, 9, 10*.

R. L. Davidson, 8*, 9, 10*.

W. S. S. Gilbert, 4, 10.

E. A. Guymmer, 4, 5, 10.

G. S. Reed, 1, 2, 4, 6, 7.

W. R. Snow, 1, 4, 10.

E. G. Stephens, 3, 4, 9, 10.

C. R. Sutton, 8.

F. L. Wall, 1, 3, 4*, 7, 10*.

R. G. Wilton, 4, 8, 10.

SENIOR PUBLIC EXAMINATION.

A.—General Honours List—

- J. A. Love (first in South Aust.)
- E. G. Dorsch.
- H. K. Nield
- I. E. Ashby

B.—Special Honours List—

- English—1, J. A. Love (Tennison Medal.)
- Latin—2, J. A. Love; 3, C. A. Hemsley; 3, E. G. Dorsch; 8, L. R. De Garis; 14, R. S. G. MacLennon.

German—2, E. G. Dorsch; 5. H. K. Nield.

Geometry—3, J. A. Love; 14 L. R. DeGaris.

Physics—4, A. K. l'Anson

Chemistry—1, J. A. Love.

Pass List—

[1, English; 2, History; 3, Greek; 4, Latin; 5, French; 6, German; 7, Arithmetic and Algebra; 8, Geometry; 9, Trigonometry; 10, Physics; 11, Chemistry.]

I. E. Ashby, 1, 2, 4, 5, 7, 8, 11.

R. S. Davey, 1, 2, 4, 8, 11.

E. G. Dorsch, 1, 3, 4*, 5, 6*, 7, 11.

A. H. Guymer, 1, 4, 5, 7, 8, 11.

A. K. l'Anson, 1*, 2, 3, 7, 9, 10.

J. A. Love, 1*, 3, 4*, 7, 8*, 9, 11*.

A. McCoy, 1, 4, 6, 7, 8, 11.

E. W. J. Millhouse, 1, 2, 4, 7, 9.

T. R. Mellor, 1, 7, 8, 9, 11.

H. K. Nield, 1, 4, 6*, 7, 8, 9.

H. B. Piper, 1, 2, 4, 6, 7, 9.

G. E. Roberts, 2, 4, 6, 7, 8, 10, 11.

J. H. Rogers, 4, 7, 8, 9, 11.

L. D. Rooney, 1, 7, 8, 9, 10, 11.

G. S. Shipway, 1, 4, 6, 7, 11.

L. D. Waterhouse, 1, 2, 4, 5, 8.

The following passed in four subjects, only needing one more to complete pass:—

L. R. DeGaris, 1, 4*, 8*, 9.

C. A. Hemsley, 1, 4*, 6, 11.

R. S. G. McLennon, 1, 2, 4*, 5.

C. S. Marchant, 1, 2, 4, 6.

R. M. Tucker, 1, 4, 5, 8.

JUNIOR PUBLIC EXAMINATION.

(A) GENERAL HONOURS LIST.

A. R. Southwood (top boy in S.A.)

R. H. Berriman.

H. P. Tuck.

H. W. Davies.

J. N. Davies.

C. E. H. Palmer.

(B) SPECIAL HONOURS LIST.

English—H. W. Davies (top boy in S.A.), A. R. Southwood.

Geography—R. H. Berriman.

Latin—A. R. Southwood (top boy of the list), H. P. Tuck.

Arithmetic—R. H. Berriman, H. F. Wark, C. E. H. Palmer.

Algebra—R. H. Berriman, A. R. Southwood, A. D. Brooker, J. N. Davies.

Geometry—A. R. Southwood (top of the list), A. D. Brooker.

Chemistry—A. R. Southwood (top of the list), R. H. Berriman (second on list), H. W. Davies, H. P. Tuck, H. D. Angwin.

(C) PASS LIST.

[1, English; 2, History; 3, Geography; 5, Latin; 6, French; 7, German; 8, Arithmetic; 9, Algebra; 10, Geometry; 12, Chemistry.]

R. H. Berriman, 1, 3*, 5, 7, 8*, 9*, 10*, 12*.

A. D. Brooker, 1, 2, 8, 9*, 10*, 12.

H. W. Davies, 1*, 5, 7, 8, 9, 10, 12*.

J. N. Davies, 1, 3, 4, 5, 8, 9*, 10, 12.

S. R. Delbridge, 1, 5, 6, 9, 10.

A. K. Gault, 1, 2, 3, 6, 8, 9, 10, 12.

D. W. Gordon, 1, 6, 8, 9, 10.
 L. Gurner, 1, 4, 5, 8, 9, 10, 12.
 M. Hains, 1, 2, 9, 10, 12.
 H. W. Hummel, 1, 5, 6, 9, 10.
 G. H. Kendrew, 1, 5, 9, 10, 12.
 K. H. Kirkman, 1, 8, 9, 10, 12.
 L. W. Linn, 1, 5, 8, 9, 10, 12.
 J. McNeil, 1, 3, 5, 6, 8, 9, 10, 12.
 C. E. H. Palmer, 1, 3, 5, 8,* 9, 10,* 12.
 G. DeQ. Robin, 1, 5, 8, 9, 10, 12.
 A. R. Southwood, 1,* 3, 5,* 7, 8, 9,*
 10,* 12*
 H. P. Tuck, 1, 2,* 3, 5,* 8,* 9, 10, 12.*
 B. H. Wade, 1, 2, 8, 9, 10, 12.

The following obtained four passes,
 five being required for a complete
 pass :—

H. C. Brice, 1, 2, 9, 10.
 W. B. Ferguson, 1, 6, 8, 9.
 F. R. Hone, 1, 6, 9, 10.
 F. A. Norton, 5, 7, 8, 9.
 R. L. Rhodes, 8, 9, 10, 12.
 A. H. Virgint, 1, 5, 9, 12.
 H. F. Wark, 6, 8,* 9, 10.

SENIOR COMMERCIAL EXMINATION.

(A) GENERAL HONOURS.

R. C. Williamson (top, wins the Senior
 Commercial Scholarship).

(B) SPECIAL HONOURS.

Geology—G. G. Watts.

(C) PASS LIST.

[1, Ccmmercial Arithmetic and Book-
 keeping; 2, Commercial History and
 Geography; 3, English; 4, History;
 7, Arithmetic and Algebra; 9, Trigo-
 nometry; 14, Geology.]

R. C. Williamson, 1, 2, 3, 4, 7, 9, 14.
 F. Gill, 3, 14.
 E. L. P. Goddard, 9.
 G. G. Watts, 2, 3, 7, 9, 14*.

JUNIOR COMMERCIAL EXAMINATION.

(A) GENERAL HONOURS LIST.

E. P. Howard.

D. G. French.

(B) SPECIAL HONOURS.

English—E. P. Howard.

Book-keeping—E. H. Chinner (top of
 the list), D. G. French (bracketed
 first), E. L. P. Goddard.

(C) PASS LIST.

[1, English; 2, Commercial Arith-
 metic; 3, Commercial Geography; 4,
 Book-keeping; 5, Business Correspon-
 dence.]

C. C. Allen, 1, 2, 3, 4, 5.
 D. G. French, 1, 2, 3, 4*, 5.
 E. P. Howard, 1*, 2, 3, 4, 5.
 H. H. Shannon, 1, 2, 3, 4, 5.
 E. H. Chinner, 2, 3, 4*, 5.
 E. L. P. Goddard, 3, 4*.
 H. R. Palamountain, 1, 4, 5.
 A. G. Ward, 4.
 C. A. Willcox, 5.

PRIMARY EXAMINATION.

[1, English; 2, Arithmetic; 3,
 Geography; 4, History; 6, Latin; 9,
 Algebra; 10, Geometry.]

C. S. Charlick, 4, 6, 9, 10.
 D. C. Cooper, 4, 6, 9, 10.
 L. Crompton, 4, 6, 9, 10.
 S. C. Downing, 4, 6, 9.

J. F. W. Dunn, 4, 6, 10.
 G. S. M. Fowler, 4, 6, 9, 10.
 A. E. C. Gepp, 4, 6, 9, 10.
 A. S. H. Gifford, 4, 6, 9, 10.
 H. E. Hoad, 3, 4, 9.
 G. W. Kennedy, 4, 9, 10.
 W. W. Langsford, 4, 9, 10.
 P. A. C. Lewis, 4, 9, 10.
 M. A. Lillecrapp, 4, 9, 10.
 D. D. Magarey, 4, 6, 10.
 R. F. Matters, 4, 6, 9, 10.
 M. V. Maughan, 4, 9, 10.
 T. R. Millikan, 4, 6, 10.
 E. L. Mitton, 4, 10.
 R. A. Nock, 4, 6, 9, 10.
 G. P. Rayner, 4, 6, 9, 10.
 M. J. M. Shannon, 4, 6, 9, 10.
 W. E. R. Tiller, 4, 6, 10.
 G. C. Walkem, 4, 10.
 R. White, 4: 6, 9, 10.

—
 SCHOOL OF DESIGN EXAMINATIONS.

First Grade Freehand—

Good—O. R. Kennett, O. Heinrich,
 K. J. McEwin, K. M. Drew, J. F.
 W. Dunn, C. C. Allen.
 Pass—R. L. Williams, A. M.
 Kleinig, R. J. Tonkin, L. H. Silver,
 K. J. Mellor, L. Doman, H. W.
 Stempel, S. McCoy, H. B. Moody.

Second Grade Freehand—

Excellent—R. A. Nock.
 Good—A. F. Stanley, A. H. Preston,
 H. T. J. Edwards.
 Pass—G. G. Watts, M. J. Shannon,
 G. W. Kennedy, B. K. Marshman.

First Grade Model—

Excellent—O. R. Kennett, O. Hein-
 rich, R. L. Williams.
 Good—F. H. Hübbe, A. F. Stanley,
 R. H. S. Dunn.
 Pass—R. R. Snell, K. J. McEwin, S.
 J. Brown, M. W. Rigby, G. W.
 Kennedy, S. Blackney, L. H.
 Silver, H. T. J. Edwards, V. J.
 Lewis, C. C. Allen, H. B. Moody.

Second Grade Model—

Excellent—A. G. Ward, R. A. Nock.
 Good—C. M. D. Bower, A. H.
 Preston.
 Pass—L. N. Rayner, G. G. Watts.

—
 THE ROYAL DRAWING SOCIETY
 EXAMINATIONS.

Division I.—

Honours—G. W. Kennedy, A. M.
 Kleinig, E. H. Chinner, H. E.
 Hoad, L. H. Silver, R. L. Wil-
 liams.
 Pass—H. B. Moody, K. McEwin, R.
 J. Newbold, O. Heinrich, R. G.
 Brandwood, J. H. Bull, J. L.
 Cowan, H. H. Shannon, Leslie J.
 Nicholls, W. E. R. Tiller, A. H.
 Preston, R. F. Nicholls, F. McCoy,
 M. W. R. Rigby, E. S. Williams.

Division II.—

Honours—K. McEwin, E. H. Chin-
 ner, G. W. Kennedy, R. R. Snell,
 W. E. R. Tiller, C. M. D. Bower,
 E. Lang.
 Pass—H. B. Moody, R. L. Williams,
 A. G. Ward, R. F. Nicholls, R. J.

Newbold, M. W. R. Rigby, H. E.
Hoad, L. J. Nicholls.

Division III.—

Honours—W. E. R. Tiller, H. H. Shannon, F. McCoy, K. McEwin, E. L. P. Goddard, R. L. Williams, G. W. Kennedy.

Pass—A. H. Preston, O. Heinrich, A. G. Ward, E. H. Chinner, H. E. Hoad, R. R. Snell, E. S. Williams.

Division IV.—

Honours—H. H. Shannon, W. E. R. Tiller.

Pass—F. McCoy, K. McEwin, R. L. Williams, E. H. Chinner, R. J. Newbold, R. R. Snell, O. Heinrich, A. G. Ward, G. W. Kennedy, J. L. Cowan, E. S. Williams.

Division V.—

Honours—R. L. Williams, W. E. R. Tiller.

Pass—O. Heinrich, H. H. Shannon, G. W. Kennedy.

Division VI.—

Honours—K. McEwin, C. M. D. Bower.

Pass—G. W. Kennedy, O. Heinrich, J. H. Bull.

Old Boys.

Hermann Homburg has been appointed a member of the Government of South Australia, there having been assigned to him the portfolio of Attorney General. Mr Homburg had

practically the whole of his schooling at P.A.C., for on entering he was placed in the First Form, being not eight years old, and he left eight years later, from the Sixth, having passed the Senior Public Examination (then the highest). His father, now Mr. Justice Homburg, came to the school the morning that the list was published, with a handsome present as an expression of his thanks to the school and its staff. This was appropriated by the Head Master to the School Library. Our old schoolfellow has our heartiest congratulations on the distinguished honor that has been conferred upon him. We often quote Horace's saying "Dulce et decorum est pro patria mori" with endorsement; but surely it is equally great and good to live for one's native land, to serve it, and advance its best interests. This may the Honorable Hermann Homburg long do. And so say all of us.

A complimentary Smoke Social was tendered by the P.A.C. Old-Collegians' Association, to Mr. W. R. Bayly, their President, on the occasion of his departure for a trip to England and America (as it was then believed). Colonel A. C. Catt presided, and proposed first the loyal toasts, and then the toast of the evening, "Our Guest." He made many complimentary references to Mr. Bayly's ability, devotion, and success as Chairman of the Assoc-

iation, felt that he had thoroughly deserved the trip, and trusted that he would gain great benefit from it. Mr. J. R. Robertson, as a life long friend, Mr. A. W. Piper, as a fellow officer of the Association, spoke similarly, and so did the Head Master, from his own point of view, and thirty years of association, and working side by side for five and twenty of them. The Mayor of Unley (Mr. J. H. Chinner), and Messrs Alex. Melrose, G. S. Cotton (Hon. Sec. of the College), Peter Wood, Fox, and C. R. J. Glover, cordially supported the sentiments uttered and the meeting heartily endorsed.

Mr. Bayly in responding spoke words of thanks to the Head Master and others who had made his long-looked-for trip possible. He had tried to serve the School loyally during the 30 years in which he had been associated with it as a scholar and a teacher. The object of all its endeavor was the development of good citizens, and he believed that the schoolmaster played a part second to none in the attainment of that ideal. Therein lay their great privilege and responsibility. After having referred to the aspirations which he had sought to realize, the ideals which he had placed before those entrusted to his care, and the importance of big public schools such as Prince Alfred College in building up character, he said the time he had spent as a teacher had been a valuable investment, and no nobler divi-

dend could he have desired than the expressions of goodwill which they had showered upon him that evening. (Applause) The old scholars also had a big part to play, and he was glad if he had been able to do something in the direction of maintaining and developing the organization. He attributed much of its recent success to the Secretary (Mr. Miller) and the Treasurer (Mr. Collison).

A capital programme was carried out, humorous recitations being given by D. M. Davidson, and songs by H. L. Jessop, J. M. Bath, W. B. Lang, and E. R. Snow, accompanied skilfully by W. Crosby.

Mr. J. H. Chinner has been elected Mayor of the City of Unley, returning to the civic chair by the vote of a large majority of his fellow citizens.

The Rev. T. H. Frewin, M.A., has been appointed rector of All Saints' parish at Hindmarsh. For the past eight years he has been rector at St. James, Jamestown, and latterly rural dean of Petersburg.

In the glorious victories over Victoria and New South Wales at cricket Clem Hill played the leading part, not only as captain, but as by far the highest scorer on each occasion. In the former match his tally was 176, and in the latter he played a splendid innings,

totalling 205. His brothers, Roy with the ball and Solly with the bat, rendered able assistance.

Edgar H. Newman, so long favourably known as managing clerk for Messrs. Colton and Johns, has left Adelaide for Sydney, there to enter into partnership with a prominent firm of solicitors. We wish him every success. He will be missed from Kent Town Church Choir, the Bach Society, our old scholars' gatherings, etc.

A. E. S. Clarke is hon. secretary of a Literary Societies' Union in the Northern Areas. He himself secured first place for impromptu speaking, and first for oration; he was also in the Dramatic Scene (from Hamlet) which gained first place. Other old P.A.C.'s gave help and won successes also.

R. Hayley Lever has been invited by the famous Walker Art Gallery at Liverpool, England, to exhibit his Royal Academy picture at that Gallery. Similar requests have come from Hull, Brighton, Cheltenham, and Oldham Exhibitions. He is engaged upon pictures for the Royal British Artists' Winter Exhibition. Mr. Lever proposes shortly to make his head quarters in London to paint scenes on the Thames, etc.

S. B. Robertson, who was second

lieutenant in the E Company, 10th Australian Infantry, Adelaide, has passed the examination for first lieutenant in Queensland, being top of the list.

Mr. Theodore Roosevelt in his first contribution on "African Game Trails" published in the London "Daily Telegraph" refers to Leslie Tarlton, who has organised the party for the Ex-President of the United States. He says: "Mr. Tarlton is a famous hunter, and he has never visited England. It is exceedingly interesting to meet men who have typified in their lives and deeds the greatness of the English Empire, yet have never seen England."

J. W. Styles, the President of the Melbourne Branch of the P.A.C. Old Collegians' Association paid us a visit in September, and was very pleased with the improvements effected in the School recently.

Dr. C. J. Davenport, who has been for several years a medical missionary in China, has returned from a furlough by railway across Europe and Asia to Dalny, thence by steamer to Shanghai. Sir Claude Macdonald, the British Ambassador in Tokio, was one of the fellow passengers; indeed most of them were English or spoke English. It was a most enjoyable journey.

The Rev. Ray Rooney has returned to his arduous sphere of labour at Bambatana, Choiseul. Dr. Brown has a photo of him amidst his dark neighbours.

Arthur G. Trott, who has completed his course of dentistry in England with great credit, is now studying at the University of Pennsylvania, hoping to take the degree of D.D.S. at that famous place of dental training.

Bret Day is at the same school of dentistry, and hopes to qualify at the end of the present session.

Laurence Landseer, of the River Murray trade, attended His Excellency the Governor on his recent trip in Landseer's ship the "Ruby."

Ben Chaffey is having new craft built for the River Murray trade.

The Rev. J. H. Allen has been admitted into full connexion as a minister of the Methodist Church, and has volunteered for its missionary work in India. This is the first time the Methodist Church of Australasia has sent a missionary to India, so we rejoice that a Prince Alfred old boy has been chosen for this pioneer work, and wish him health and great success in his important sphere of labour.

Frank Rooney, now of the Gwalia Mines in W.A. gave us a call. We are glad to hear that in addition to his daily occupation he finds time to be Sunday School Superintendent and to help in other church work.

Dr. E. J. Counter, President of the South Australian Odontological Society, took an important part in the proceedings of the Australian Dental Congress recently held in Melbourne.

Percy Goode, who has just returned from London after eight years service in the business of Messrs. Matthew Goode and Co., was entertained at a dinner by the departmental managers and travellers of the Adelaide house of that firm.

Tom Roberts has been doing some splendid rifle shooting lately. The greatest triumph of all was at Randwick, near Sydney, where he won the King's, the most coveted prize of all. G. Howitt led up to the conclusion of the 800 yards range. Roberts made one short of the possible at 1,000 yards. This made him tie with another man for the aggregate. In the shoot-off Roberts won, and was cheered. Frank Best also won some prizes. Howitt has been chosen to shoot for S.A. in the Empire Match.

Samuel R. Cooper, so long earnest in

promoting rifle clubs and rifle shooting, has just won the "Kingship," the Metropolitan. He too tied for top place and won in the fire-off; a most popular victory. Mrs. Cooper handed the laurel wreath to her husband.

The Rev. E. G. Neil wrote from Samoa at Gagaemalae, where he has been erecting a large Mission House, and has been architect, builder, and carpenter of it. He paid us an unexpected visit this December after eight years of vigorous toil; a furlough seemed necessary.

W. J. Colebatch after he left us went to Roseworthy Agricultural College and now returns to be Principal of that same place for the year 1910, during the year's holiday that has been granted to Professor Perkins. Colebatch, after a distinguished career at Roseworthy, under Professor Laurie, when he was easily first man of his year, went to Edinburgh University, where he obtained the degrees of B.Sc. and M.R.C.V.S. He was then invited to join his old chief, and was given a place on the staff of the Lincoln Agricultural College, New Zealand. After three years in this position he was appointed assistant chief veterinary officer of the Victorian Agricultural Department. He has now accepted the position of Superintendent of Agriculture in the South

East of our State, and manager of the Kybybolite Experimental Farm.

Dr. Norman Prior has a fine practice at Masterton, N.Z., with two of his sisters, qualified nurses to help him.

John Homburg, LL.B., has returned from a most enjoyable trip to Europe, and has commenced the practice of his profession at Murray Bridge.

Dr. J. Burton Cleland has been appointed principal assistant micro-biologist to the New South Wales bureau of micro-biology.

Harry W. Charlick has returned to the State, after a most interesting and profitable tour in Europe.

Arthur Otto, the well-known organist and pianist, has left for Paris for further study and to cultivate his voice, already of great power and beauty.

R. S. Hudson favoured us with a call, and also bore greetings from Charlie, who is doing well on the land in the north-west of W.A.

The Boys' Club in connection with Trinity Congregational Church, Perth, is developing into one of the largest of its kind in that city, Geoffrey Ryder, and Verney East have much to do with its management.

Percy Hodge is in the Strahan Office of the Union S.S. Co., of New Zealand. Strahan is the port for the famous Mt. Lyell Copper Mine and for the Zeehan Smelting Company, so there is plenty to do.

Dr. F. H. Shorney has received the ad eundem degree of M.D. at the Adelaide University. He is commencing the practice of his profession in Adelaide.

E. V. Clark, B.Sc., has been appointed lecturer on physics and electrical engineering at the Adelaide University.

Dr. Malcolm Scott has gained the F.R.C.S. in London, taking the Primary in May and the Final in the following November; very quick work indeed. He is returning to his native State early in the year.

The Hon. H. C. E. Muecke, M.L.C., has received a cable from his son, Dr. F. F. Muecke, stating that he has gained the highly valued degree of Fellow of the Royal College of Surgeons, England. We heartily congratulate. Dr. Muecke has been appointed Surgeon at the London Throat Hospital.

In the examinations held by the Institute of Accountants of Australia we note with pleasure that L. B. Shut-

tleworth has been successful in the Final, and S. H. Jackman in the Intermediate.

J. L. Jona, B.Sc., who is a demonstrator in Physiology at the Melbourne University, was invited to examine in that subject at the Adelaide University at the Junior and Senior Examinations.

Jacob Jona, B.Sc., has successfully completed Division II. (that is the third year) of the Medical Course of the University of Melbourne, obtaining honours in Senior Anatomy and Physiology.

The University scored great success at the Summer Rowing Regatta, winning four out of the five races for which they entered. We are glad to see "old Reds" in the crews. In the boat that won the Forrester Fours and the Le Hunte Cup C. T. Madigan was stroke, P. C. A. Fornachon bow, and K. Wade cox. In the crew that won the Bosanquet Fours were G. H. Burnell, R. M. Scott, and Wade cox again.

Herbert H. Wheatley has completed his five years' articles with the legal firm of Haynes, Robinson, and Cox, has passed his final examination and has been admitted as a Barrister and Solicitor of the Supreme Court of West Australia. We offer heartiest congratulations.

The "old boys" at the Adelaide University have gained great victories again, especially is this noticeable in Medicine and Science. In the M.B. and B.S. Ronald Trüdinger heads the list, and he thereby wins the best scholarship, the Everard; and Tom. G. Fleming and David M. Steele gain the full degree also. But our most conspicuous success is in Science, every one of the six men to gain this degree being an "old Red," viz., P. C. A. Fornachon, who has won the mathematical honours, and W. B. Angwin, R. J. Dumas, A. D. Greenlees, E. M. Holder, G. E. M. Jauncey, and L. W. McNamara. R. W. Tassie, B.Sc., M.E., and A. R. Wight have also secured the Diploma in Applied Science. These are now reaping some of the reward of their skill acquired and industry manifested both at school and since. G. A. Hancock, now in Hongkong, has studied further and so changes the B.A. to M.A., though busy with life duties all day long. O. Rischbieth has gained his B.A. degree with first-class honours in Classics, and Shirley W. Jeffries gains the degree of Bachelor of Laws. Two came up for ad eundem degrees, having gained their honours in other universities, but wishing to have their names on the roll of the University of their native State. H. F. Shorney, M.D. of Melbourne, and W. J. Colbatch, B.Sc. of Edinburgh, now hold the

same degrees of Adelaide. A. R. Hogen has won the Diploma in Commerce.

These are "Final honours," honours at the conclusion of a University course, and there are many in the earlier stages, pledges and promises of later triumphs. J. S. Verco and G. H. Burnell are Elder Prizemen, the head students of the first and second year of the M.B. respectively. L. A. Whittington wins the Roby Fletcher Prize for Psychology and Logic. (What a great deal we must know amongst us!)

The full lists of the undergraduates follows:—

INTERMEDIATE EXAMINATIONS.

(An asterisk denotes First Class.)

M.B. and Ch B.—

4th year—S. L. Corry, W. M. M. Sinclair, E. C. Black.

3rd year—L. G. Muirhead,* A. C. Wilton, E. A. H. Russell, N. E. Seppelt, A. O. Böer, H. W. D. Stoddart, C. F. Drew.

2nd year—G. H. Burnell,* (Elder Prize), L. G. Tassie.

1st year—J. S. Verco* (Elder Prize), R. A. Haste, B. W. Wibberley, L. L. Davey, W. J. W. Close.

(Passed in Anatomy, Biology, and Physics, thus completing First Year—S. E. Holder.)

L.L.B.—

A. L. Pinch—Property (II.), Law and Legislation.

- G. D. Cowan—Property (II.), Law and Legislation.
- H. A. O. Rankin—Wrongs, Constitutional Law.
- L. A. Whittington—Evidence and Procedure, Latin, Psychology, Logic (Roby Fletcher Prize for Psychology and Logic).
- D. A. Roberts—Constitutional Law.
- S. W. Jeffries—Roman Law, Law and Legislation, History of the United Kingdom.
- B.A. and B.Sc.—
- O. Rischbieth—Classics* (Honours).
- W. A. Potts—Pure Mathematics (II.),* Physics (II.), Inorganic Chemistry.*
- A. E. Dawkins—Pure Mathematics (II.),* Physics (I.), Physics (II.), Inorganic Chemistry,* Applied Mathematics.
- W. W. Cooper—Pure Mathematics (II.), Physics (II.), Applied Mathematics.
- R. M. Scott—Pure Mathematics (II.), Applied Mechanics, Hydraulics.
- A. H. Bell, B.A.—Greek (I).*
- A. E. Howard—Greek (I.), Latin (I.), Inorganic Chemistry.
- W. L. Davies—Greek (I.), English Language and Literature,* Psychology (Proxime accessit. John Howard Clark Scholarship).
- L. J. Darwin, B.A.—Greek (II.),* Latin (II.).*
- G. M. Potts—Greek (II.),* Latin (II.).*
- J. L. Rossiter—Greek (II.), Latin (II.), English Language and Literature, Education.
- C. H. Comley, B.A., B.Sc.—Latin (I.).
- A. H. Carne—Latin (II.), Inorganic Chemistry.

H. E. Pearson, B.Sc., has been appointed House Master at Roseworthy Agricultural College. His last office was head of the Gladstone Continuation School. Ernest Pearson was one of a famous Eleven First Class P.A.C.'s in 1899. In alphabetical order in each class names were then; honours and order of merit were not the fashion, so who was first could only be guessed. However, the eleven included J. R. Wilton, to be Senior Wrangler, lecturer at an English University; J. F. Ward, his close rival, to be a master at P.A.C.; H. J. Priest to be Mathematical Professor at the Adelaide University; M. L. Scott, to be a doctor, F.R.C.S., Everard Scholar, etc.; Ernest Chapple, to be an Engineer in charge of great works in British Burmah, and all to be useful and successful men. Pearson

was in good company then, and awakens happy memories.

—

The Rev. Wm. Jarrett has been called to the Congregational Church at Renmark.

—

The Rev. R. Taylor has accepted the pastorate of the Baptist Church at Mount Barker.

—

T. Gordon Robertson has taken his B.A. at the Sydney University.

—

Erwin Basedow, who has been for some years in charge of the Daly River Smelters in the Northern Territory, has returned to Adelaide.

—

Dr. Rupert Heggaton, who has a medical practice in New South Wales, has been on a Christmas visit to his parents, friends, and old home.

—

Frederick W. Wheatley, B.A., B.Sc., Head Master of the Rockhampton Grammar School, formerly a member of our teaching staff, has been paying a vacation visit to the old scenes.

—

Lionel Boas, B.Sc., is one of the staff in charge of the "Young Australians" who have come from W.A. to tour the Eastern States of the Commonwealth.

Intercollegiate Cricket Match.

—

Although we have not won the match this year, we feel sure that our team is to be congratulated on the game they played, giving us a characteristic exhibition of the true Prince Alfred and British spirit, which never knows when it is beaten. We must also congratulate our rivals on their victory.

FIRST DAY.

Steele won the toss from Murray, and sent in D. Steele and Ward to open the Princes' innings on one of those excellent wickets which Mr. Checkett is so famed for preparing. Murray and Moyes led the Saints' attack, and after a few minutes' play Ward was bowled by the latter.

1—6—18.

K. Steele filled the vacancy, but he was not to stay long, as Pellew fielded a ball smartly at cover and Ken. was run out.

2—2—26.

Willcox was the next man in, and after a few overs Badger relieved Murray, 50 being hoisted after 44 minutes' play. When the score stood at 62 Moyes handed the ball to Hayward. The score then crawled along slowly. After 70 minutes' play Don Steele obtained his 50, but when he had made 6 more was dismissed by a magnificent catch by Murray at deep leg. Don

had played a very useful innings, and his score included 4 fourers.

3—56—91.

Goddard came next, and played out time till the luncheon interval, when the score stood at 3 for 96.

On resuming Goddard was bowled by Moyes' third ball.

4—3—97.

Warnecke filled his place, but was not in very long before he was bowled by Murray.

5—3—110.

Cowan then faced the attack, and runs came very slowly. After he had made 8 he was cleverly thrown out by Pellew.

6—8—125.

Sullivan came in, and after five runs had been added he saw Willcox caught out by Daw.

7—45—130.

Willcox also had played a very valuable innings, and contributed a good score when it was needed.

When Howard had made 9 he was missed by Moyes, but after advancing his score to 29 he was smartly caught out by Stevenson at mid-off.

8—29—187.

After Snow had made 7 the 200 was hoisted in three hours' play. Soon afterwards Sullivan, who had made a useful 40, was caught out by Swift at point.

9—40—207.

Ashby came next, and after making

2 gave a chance to Murray off Davidson, which was not accepted. At 231 Snow put his leg in front of a ball from Hayward, and the innings closed.

At 10 minutes to 5 Moyes and Pellew opened Saints' innings. After making 6 the latter was smartly caught in the slips by Willcox off K. Steele.

1—6—9.

Moyes and Murray became associated, and brought up the 50 in half an hour. At 56 Steele handed the ball to Howard, and Cowan went on at the other end. The change did not prove effective, as the batsmen continued to hit freely. A few minutes before 6 Moyes was caught out at mid-off by K. Steele off Ashby. The score stood at 2 for 115, Murray being not out 52. Stumps were then drawn.

SECOND DAY.

Woodley, who was next in, did not last long, being bowled by K. Steele.

3—2—127.

Hayward was bowled by Ken's next ball.

4—0—127.

Daw came next, and soon saw Murray, who had given a fine exhibition of batting, bowled by K. Steele.

5—59—132.

After Swift had come in Howard relieved K. Steele, and D. Steele, Cowan. The score was carried along to 188, when Ashby bowled Daw.

6—34—188.

Davidson went in, and with the score at 6 for 194 an adjournment was made for luncheon.

On resuming the play settled down into a steady fight for runs. After three hours' play the 231 was passed. The score gradually crept up to the 300, and at 302 Swift was caught by Goddard off Howard. Swift had played very well and made top score.

7-63-302.

With his next ball Howard clean bowled Williams.

8-0-302.

The next ball obtained for Howard the coveted "hat trick," as Badger put his leg in front of it and had to retire. This hat trick evoked great enthusiasm, and Howard is much to be congratulated.

9-0-302.

Stevenson came in, and Willcox took Ward's place behind the wickets. Some good hitting was then witnessed. At 334 Davidson closed the innings by hitting one of Goddard's deliveries to K. Steele, who held the catch.

Warnecke and D. Steele started to make up Princes' deficiency. Double figures were soon reached, but, after making 4, Warnecke was bowled by Murray.

1-4-27.

Willcox joined Steele, who was hitting nicely. However, at 21 the latter was bowled by Murray.

2-21-34.

Stumps were drawn with the total at 53, Willcox being 7 and Snow 10 (both not out).

THIRD DAY.

The match was continued in the presence of His Excellency the Governor, Sir Day Hort Bosanquet, who was an interested spectator. Willcox was missed by Swift, but was soon bowled by Murray when he had made 19. Snow soon afterwards gave a chance to Moyes, which he accepted.

4-13-75.

Ward and K. Steele carried the total to 96, when the bowlers were changed. This proved effective, as Ken was bowled by Hayward by a ball that broke much.

5-14-96.

Cowan came in, and the 100 was hoisted in as many minutes. However, Ward played over the top of a ball bowled by Davidson.

6-12-100.

Goddard, after making 7, fell to Davidson in the same way.

7-7-118.

Sullivan came in, and soon saw Cowan caught by Murray off Davidson (The third catch with which the fieldsmen fell in his plucky efforts to reach the ball).

8-9-120.

After 2 had been added by Sullivan, Howard was dismissed by Davidson.

9-0-122.

Soon afterwards Sullivan hit a sure thing to Badger, and the innings closed at 128, Ashby remaining not out 3.

Moyes and Murray went in to make the 26 necessary for a win. Four byes off a ball that hit the wicket but did not dislodge a bail reduced this to 22, but before Moyes could score he was out l.b.w. to K. Steele.

1—0—4.

Stevenson and Murray then hit up the remaining runs, and the match closed as a win for Saints by 9 wickets.

His Excellency the Governor then handed the shield to Murray, and congratulated both teams on the games that they had played. Cheers were given for the Governor and for the two schools.

Gymnastics.

GOLD MEDAL COMPETITION.

On Friday, December 10, the inter-collegiate competition for the gold medal presented annually by Mr. Hugo Leschen took place in his gymnasium in Pirie Street. In all there were six Competitors—three from Kyre, two from St. Peter's, and one from Prince Alfred. Stump and Hayward, of Kyre and St. Peter's respectively, had a very

P.A.C. FIRST ELEVEN.

close fight for top place. When all their exercises were finished Mr. Leschen said that Stump had $95\frac{3}{4}$ marks and Hayward $92\frac{1}{2}$ out of 100. He also added that if Hayward had been successful in one exercise he had missed he would have just beaten his opponent. Mr. Leschen declared himself satisfied with the work, and said it was well up to standard. We take this opportunity of congratulating Stump on his success.

Picnics.

HIGHER PICNIC.

Monday, November 29, was chosen by the Upper Sixth as a suitable day for their picnic, and the Head Master

readily gave his consent. After several months of brain-racking study in preparation for the exams our students were by no means slow in grasping the opportunity offered of spending a day in the hills. Punctually at 9 a.m. the drag chartered by our business-like treasurer arrived, and after a short delay, caused by the boarders as usual not being ready, we departed on our picnic way amid tumultuous cheering and melodious strains. We first drove through the city, enlivening the passers by by singing our school song, and after being almost capsized through our prancing steeds shying at a passing 'lectric, we passed on. Weather conditions being superb, it need hardly be said that the drive through the hills to the National Park was most enjoyable.

The panorama of the inundating foothills, set off by winding valleys in the foreground, the Adelaide plains, golden in the sunshine with ripening crops, then the inviting waters of the gulf, and in the far-off horizon the faint outline of Yorke's Peninsula, presents from Belair a scene unsurpassed in beauty. We did not forget the hospitality with which our friend the Rev. E. S. Jose, of Belair, treated us last year, for on passing his residence we gave him three hearty cheers and "He's a jolly good fellow." Vast improvements have been made to the Park, including new arbors, refreshment rooms, drives, &c., showing the increasing

popularity of this holiday resort. A good game of cricket served to whet our appetites for luncheon, and to that we did full justice. Our search for cherries was fairly fruitful, as some sadly felt next day. Some hypnotism by Professor Correll, tea, another game of cricket, and a pleasant drive home concluded our day's outing. All had enjoyed it to their hearts' desire, and most sunburnt faces testified to the ardent welcome accorded us by old Sol.

SENIOR PICNIC.

The Senior Picnic was held this year at Belair on Thursday, November 25. Two drags were hired for the occasion, and at about 10 a.m. they left the College. The journey up to the hills was pleasant, and when we got among the heights a cool wind blew and continued all the afternoon. We reached the National Park between 11 and 12 o'clock. Some of us wandered off among the hills and others began to play cricket. After an hour had been thus spent, a halt was made for lunch. After the inner man had been satisfied, cricket was once more turned to. Two sides were chosen, and a good game was played. Some others went up Long Gully after strawberries, and still others played tennis. At about 6 p.m. we all had tea, and soon the drags were ready to bring us back. The journey home was delightful, various

songs with good choruses being sung, which were much appreciated. The drags arrived at the College at about 8 p.m., and after cheers had been given the company broke up, everybody satisfied that they had had an enjoyable outing.

JUNIOR PICNIC.

The Junior Public Picnic was held on Tuesday, November 22, when two drags set out for Belair at a quarter past nine. When leaving the boys gave three hearty cheers, which caused a rather jealous feeling among the classes that were hard at work and less fortunate just then. All went well until Unley Road was reached, when a leading horse of the second drag shied, and brought about a collision with a tram pole. As a result of this the pole of the drag was broken, and the horses bolted. However, a gentleman, by running out and stopping the horses, prevented any further damage being done. Another drag was procured, and reached Belair almost as soon as the first, which had gone on ahead.

On arriving at the Park the party decided on the customary game of cricket, but this had to be abandoned on account of the rain. However, after dinner the game was resumed, and proved to be very exciting, the winning side coming out on top by seven runs. After this the party dispersed to buy fruit. At half past six the drags started

for home, and soon the hills were made to echo with the shouts and songs of the merry boys. The College was reached about eight o'clock, and the boys went to their homes with the unanimous opinion that the outing had been a complete success.

Cadet Notes.

It is pleasing to note that the numbers and work of the corps have been very satisfactory during the past year. Our present strength is 182, or eight more than last Christmas. Interesting work has been carried out in the way of battalion drill and skirmishing. The signalling class, under Lieut. Reed's enthusiastic instruction, has performed good work. It is to be hoped that cadets who are returning next year will do their utmost to secure recruits to fill the many vacancies that will be caused by boys leaving school. A word must be mentioned about the enthusiastic manner in which the boarders enter into the cadet work. During the past year almost every member of the House has been a cadet.

The most interesting event of the past term was the inspection by the State Commandant on September 30th. Col. Lee was attended by Lieut.-Col. Neale, Commanding Officer for Cadets, and Capt. Ralph, Staff Officer for Cadets. The Corps was drawn up in line

of company columns with Capt. Blackett in command, and received the Commandant with the general salute. Each company was then inspected by him. During the inspection the Commandant was particularly impressed with the steadiness of the cadets and commented favourably on their general bearing. He drew the officers' attention to several cadets, who were wearing articles of apparel that are not part of the uniform, such as collars and watch-chains. Many cadets find it hard to appreciate the regulation that absolutely nothing must be added to or taken from the prescribed uniform, and they often bring discredit upon their company by disregard of this simple, but very necessary regulation. After inspection the companies were dismissed to their private parades, with orders to proceed with general company work, which was watched with interest and satisfaction by the Staff Officers. Col. Lee was especially pleased with the work the signalling corps was doing under Lieut. Reed, and gave both officer and cadets much encouragement by his interest in their work. Finally the companies were drawn up on three sides of a square for the distribution of the trophies won in the Commonwealth Cadet Matches, in which our men were so successful, and details of which appeared in the last "Chronicle." When laid out on a table spread with the Union Jack and the School flag our trophies

made quite an imposing array, and the success implied in the display won gratifying commendation from Col. Lee.

On October 7th the Head Master granted permission to the Corps to proceed to the Port ranges in order to complete our class firing for the year. Weather conditions were good, but shooting at 300 yards with a third-class target will never yield anything more than poor scores. However, some good shooting at 400 yards was witnessed, Cpl. Watts putting up the fine score of 65 out of a possible 75. The class-firing results were as follows:—
 B Company. — Marksmen : Sgts. McCoy, Burden, and R. S. Davey, Lance-Cpl. H. W. Kelly, Cadets R. Pender, Lang, Noble, Warnecke, Bower, Drew, Cowell, Rogers, Goddard, L. Pender, and Richardson : First Class, 16; Second Class, 17; Third Class, 12. E Company.—Marksmen : Capt. Blacket, Lieut. Charlick, Sgts. Wilton and Willcox, Cpls. Watts and Cowan, Lance-Cpl. MacLennan, Cadets M. Blacket, Day, R. L. Williams, Phillips, and J. F. Dunn ; First Class, 11; Second Class, 10; Third Class, 27. G Company.—Marksmen : Lieut. Marchant, Cpls. Sutton and K. Mellor, Cadets J. Davies, Haslam, Harman, and Palmer ; First Class, 7; Second Class, 7; Third Class, 32.

During the year we entered teams for the Schools of the Empire Shooting Competitions (senior and junior). These

are matches open to all public schools throughout the British Empire, and the Prince of Wales' Challenge Cup is held for the year by the winning school. The ranges fired at are 200 and 500 yards, with seven shots and one sighter at each range. The Junior Match was fired on November 27 at Port Adelaide ranges, the team being Cpl. Cowan, Cadets Blacket, Bower, J. Davies, J. F. Dunn, Norton, Phillips, and R. L. Williams. We commenced under favourable conditions, but a fishtail wind spoilt the shooting at 500 yards. The team totalled 381, the highest scorer being Cadet Dunn (55). The following Saturday the School was again represented on the ranges by the senior team, comprising Sgt. McCoy, Cpl. Watts, Lance-Cpl. MacLennan, Cadets Day, Drew, Lang, J. M. Maughan, and Warnecke. We were most unfortunate in being without the help of Cadet Noble, who is a very good and enthusiastic shot. He was not well enough to come that day. The conditions were far from favourable as the day was showery at first and then a strong changeable right wind came up. Our aggregate was 360, to which Sgt. McCoy contributed 57. Although the scores are far from good, the officers of the corps feel sure that an added interest has been given to shooting, and that we should see better results and more enthusiastic rifle practice next year. The best thanks of the School are due

to Capts. Harry and Possingham, Lieuts. Langsford and Pavia, for supervising our matches.

Last year money prizes were awarded at the Commonwealth Cadet Matches, and, as it is the rule of the School that a boy shall not accept any money prize, permission was obtained to use the money in a more suitable way, to encourage shooting in our corps. With part of the money medals were obtained for the highest scorers in the different competitions, and the remainder devoted to the purchase of a shield to be awarded to the company which obtains the best all-round results in the year's class-firing. A very handsome trophy has thus been added to those which have done much to maintain enthusiasm in other departments of physical work.

A good number of our cadets attended the voluntary Church Parade held on September 18th, to honour the memory of the brave fellows who fell in the South African war. The day was dusty and gusty, and the speakers were placed with the wind in their faces so that little could be heard of the service or of the sermon. However, we wished to show honour to the brave who died for King and country, and were glad of the opportunity to do so.

"Solly" Hill was top scorer in the second innings against Victoria with 58, just when runs were needed.

The Christian Union.

The first meeting of the third term was held on September 15th. Mr. S. B. Hunt, who had been prevented from fulfilling his appointment in the previous term, told the story of Judge Lindsay's great work for American boys—a thrilling story splendidly given.

Our Head Master delivered an interesting and very instructive address at our second meeting on the word "Manifested." He said his attention had been turned to St. John's frequent use of the word "manifested," as found five times in a few verses. He said that St. John taught that the way to be made good was to study the life of Jesus till that life became "manifest" clear, plain, distinct, and winning. He told the story of a tradesman who kept in his parlour a picture of the Rev. F. W. Robertson, of Brighton, and when tempted to a doubtful act used to step in and look at that face. He came back from looking at it feeling that the temptation had no power over him. He also told of a missionary whose mother's picture strengthened him in the same way, and he urged all to study the beauty of the Saviour's life till it grew vivid enough to govern our lives.

The Rev. W. A. Langsford's subject was "The Kingdom," and the Rev. J. G. Raws spoke on the life and work of William Carey and of John Coleridge Paterson.

On October 13th the Rev. W. G. Clarke, President of the College, addressed us, and drew some valuable lessons from the "Grain of mustard seed."

The Rev. A. J. Wade gave an inspiring talk on a verse of the 20th Psalm, "In the name of the Lord we will set up our banner." There must be no vacation in the time of flag flying; the Christian soldier should honour the flag by his good life and we must keep the flag flying because we were marching on to sure victory.

Mr. H. S. Stafford spoke on the report of the "Twelve Spies," and the Rev. S. C. Mugford on "Holiness and its relation to character."

The Rev. W. Heighway, who had laboured for many years as a missionary in Fiji, gave a delightful account of the great work that has been done there and in other islands.

The Rev. Eric Ingamells, B.A., an "old boy" of whom we are proud, delivered a very earnest address on the word "Christian."

The Devotional Meeting was led by R. M. Dunstone, and a profitable half-hour was spent in singing, reading of scripture, and prayer.

The University Christian Union's representatives this year were Messrs. Creswell and B. W. Wibberley, and we greatly enjoyed their manly addresses.

The Head Master's final address was

on the duty of being cheerful, of cultivating a happy disposition, of looking on the bright side of things. "Light is sown for the righteous, and gladness for them that are upright in heart." He said that the happiest people he had known were those that had most real religion, and quoted from the old Scotch psalm, "Him serve with mirth." He also quoted Jesu's wish for his disciples to keep his commandments "that their joy might be fulfilled." Only sin darkens life, and the greatest grief surely comes if I feel I am doing harm, by being untrue to my profession. From this and all evil the good Spirit can save us, and so all life be bright.

Our membership for the year has been 67.

G. S. Reed, Hon. Treasurer.

Sports and Games.

At our annual Speech Day it is customary for the Captain of the Cricket Eleven to read a report dealing with the athletic side of the school life, and as that report is not always published it may not be out of place here to review briefly what has been done during the past half year.

Cricket and football naturally take up the greater part of the time spent in games, the former in the first term giving place to a certain extent to tennis, while the latter half of the second term is devoted to athletics.

Cricket.—At the beginning of the year the Cricket Eleven, under the captaincy of K. N. Steele, concluded their programme of matches in the Association B Grade competition for the season 1908-9, winning one and losing four matches. The start for the season 1909-10 was very encouraging, as the new men at once settled down to work, and under the able coaching of Mr. S. Reedman the whole team rapidly improved. Of the first four matches played three were won easily and the fourth lost by a narrow margin only, after a splendid recovery from an almost hopeless position. These successes raised our hopes for success also in the match against S.P.S.C., but in this we were disappointed, as, after going in first and making a good score in the first innings, we were outplayed by our

rivals, and finally beaten by nine wickets. Several of our team who had shown excellent form in the preceding matches failed in this one; but after an almost uninterrupted series of wins for the past seven years we can gracefully accept this defeat, and congratulate the Blues on their well-won success. The majority of our First Eleven will now be leaving, but we confidently look to the members of this year's Second and Third Elevens to make every effort to fill their places adequately. Considerable interest was shown this year by the juniors, and competition for places in the Second and Third Elevens was keen. The result was that both teams have been very successful, each losing one match only out of eight played.

The Tennis Match against S.P.S.C. was lost by 10 rubbers to 5 in April last, and in September we were again badly beaten in the Intercollegiate Athletic Sports.

The Football season was a very successful one; three teams played every Saturday afternoon during the first half of the second term, and the form matches as usual were well contested. The Upper School Shield was won by the Lower Sixth Form, and the Lower School Shield by the Middle Fourth. The season closed with an easy win on the Oval against S.P.S.C.

During the year a tarpaved cricket pitch was put down on the ground at the rear of the College for the use of the

juniors. The pitch in front of the ground, near Capper Steet, can now be used solely for practice for the Second and Third Elevens, and the gymnasium pitch for general use. The front ground has been further improved by the planting with couch grass round the existing turf wicket. Considerably over an acre is now under couch grass, and the wickets prepared and the general condition of the ground reflect great credit on our curator, W. Gome, who has been most careful and painstaking in his work. Turf practice wickets are now being put down in the ground and should be available for use next season. This will give us increased facilities for practice, and will materially lessen the wear on the central portion of the ground.

Of the boys who have been prominent in these sports, and who are now leaving us, some mention should be made. First we have to say good-bye to K. N. Steele, who has done such good service for us in cricket and football for the past four or five years, and who, as Secretary to the Sports Committee for two years has been untiring in his efforts to promote this side of the school life; C. A. Willcox in tennis, cricket, and football, and on the Committee, has ably represented the School, and will be much missed; E. P. Howard, cricket, football, and athletics; I. Pender, twice champion of College in sports, in tennis, athletic, and football teams; H. M.

Charlick, champion of College, and in football and athletic teams; E. L. Goddard, cricket and football; A. G. Ward, cricket and football; R. M. Tucker, Sports Secretary, and in football and athletic teams; and others of our prominent players are leaving. To all of them we wish a full measure of success in life, and trust that some lessons learnt in the playing fields may, with those learnt in the class rooms, materially assist them in attaining that success.

P.A.C. v. OLD SCHOLARS.

The annual match against the "old scholars" was played this year on the College ground on Tuesday, December 7th. We were very pleased to see increased interest taken in this match, and trust that next year there will be a good attendance of "old boys," so that the day may be considered an "Old Scholars' Day" for the end of the year, as the football match against the Old Collegians' Association should be for the second term. Many "old boys" would be very pleased to renew old associations on those days, to look at their old School and note the changes that have taken place since their time.

The School batted first in the match and made an excellent stand, D. Steele playing splendidly for 82, and towards the end of the innings Goddard made 43, and Sullivan 33 not out in good style. Soon after 5 o'clock the innings was declared closed at 8 wickets for

248, and the "old scholars" had about one and a half hours to bat. Middleton and Delbridge went in first and both retired on reaching 30; C. Drew retired after making 32; but the rest of the team quickly fell before Howard and Cowan, and the innings came to an end just on time, when the score was 154, the School thus winning by 94 runs.

The scores were as follows:—

P.A.C.

D. Steele, c Drew, b Stoddart	...	82
Ward, b Marshall	...	10
K. Steele, b Wilton	...	8

FIRST ELEVEN MATCHES IN B GRADE.

First Half of Season 1909-10.

P.A.C. v. Port Adelaide B.—Won by P.A.C. by 53 runs. Port Adelaide, first innings, 46; Waters 11 not out, McDonald 11, Brausch 10. K. Steele 7 for 15, Howard 2 for 7, Ward 1 for 6. P.A.C., 99; Warnecke 12, Ward 16, D. Steele 12, Sullivan 18, Goddard 12, L. T. Cowan, 11 not out. P.A.C., second innings, 3 for 56; Ashby 2 for 13, Cowan 1 for 9.

v. North Adelaide B.—Won by North Adelaide by 1 wicket. P.A.C., first innings, 99; D. Steele 40, Ashby 12, Goddard 11, Cowan 11. North Adelaide, 143; Henschke 46, Jervois 26, Campbell 21; K. Steele 4 for 33, Ashby, 3 for 38, Howard 1 for 30. P.A.C., second innings, 3 for 135; Howard 44 not out, D. Steele 26 not out, Ward 36, Warnecke 22. North Adelaide, second innings, 9 for 92; Ashby 3 for 19, K. Steele 3 for 34, D. Steele 2 for 18.

v. West Torrens East.—Won by P.A.C. by 215 runs. P.A.C., 284; D. Steele 122, Ward 32, Cowan 34, K. Steele 22, Ashby 13, Snow 10. West Torrens, 69; Ashby 5 for 30, K. Steele 4 for 31. West Torrens, second innings, 167; Solly 55, Webb 40, Jones 24; Goddard 4 for 32, Cowan 2 for 34, K. Steele 1 for 35.

v. Linden Park.—Won by P.A.C. by 135 runs. Linden Park, 203; J. S. Ryan 104, Collins 52; Cowan 4 for 12, K. Steele 2 for 42, Howard 3 for 38, D. Steele 1 for 23. P.A.C., 338; D. Steele 102 not out, K. Steele 49, Goddard 44, Willcox 36, Ward 33, Snow 12, Howard 15, Ashby 13. Linden Park, second innings, 3 for 57; G. Munday 24; Howard 1 for 22, Cowan 1 for 19, Goddard 1 for 6.

CRITIQUE OF THE TEAM.

(By the Team)

K. N. Steele (Captain).—Very good bat, possesses strokes all round the wicket and hits hard; batted most consistently at beginning of the year, but lost form towards the close; best bowler in the team, keeps a good length and mixes pace judiciously; also a splendid field at mid-off; has used excellent judgment as captain.

(By the Captain)

I. E. Ashby. — Good leg-break bowler, with an accurate length; did not do himself justice in the College match; fair bat, slow in the field; next year should develop into a good all-round player.

L. T. Cowan. — Good bat, has a splendid drive; leg-break bowler, but as yet has not much control over the ball; fields well at third man and in deep, but in the latter place is a trifle slow.

E. L. P. Goddard.—Fair bat; played two splendid innings at the end of the term; defence rather weak; strong on the leg side, but should beware of tak-

ing balls from his middle stump to square leg; fair change bowler; good field at slip.

E. P. Howard.—Medium to fast bowler; tosses down too much leg stuff and does not bowl enough for his slips; improved bat, hits hard, but too inclined to lift; has a good cut; good field at point; splendid catch.

W. R. Snow.—An improved batsman with a very solid defence; played two useful innings in the college match; scores well at slip; runs poorly between wickets; has fielded well at mid on.

D. M. Steele (Vice-Capt.)—Is the best bat in the team, very sound defence, has forceful strokes all round the wicket, particularly a beautiful cut and cover stroke; useful change bowler; splendid field at cover.

J. R. Sullivan.—A very steady bat; has a good variety of strokes; played an excellent innings in the college match; good field at extra cover and fine leg.

A. G. Ward.—Greatly improved bat; hits hard and rarely lifts the ball; has a very good off drive; Towards the end of the year took up wicket keeping, and in two or three matches performed very creditably.

R. Warnecke.—Fair bat; at beginning of season scored consistently; has some very good off strokes; good field.

C. A. Willcox.—Fair bat, with good defence, has a very good off drive,

rather uppish in the slips; good field at slip and pull; at times kept wickets well.

— — —
SECOND ELEVEN MATCHES.

P.A.C. II. v. S.P.S.C. II.—S.P.S.C., 5 for 75; I. Pender 2 for 10, R. Pender 1 for 11, Piper 2 for 13. P.A.C., 2 for 63; Norton 19, R. Pender 28 not out.

v. High School.—P.A.C., 60; Snow 27. High School, 59; Brooker 6 for 33, Rogers 2 for 8, I. Pender 2 for 11.

v. Kyre College.—P.A.C., 99; Willcox 21, Snow 15, French 27 not out, Richardson 11. Kyre College, 7 for 108; Brooker 1 for 19, Willcox 1 for 11, French 1 for 10, Piper 2 for 18, Tucker 2 for 7.

v. Trebartha C.C.—Trebartha, 45; Brooker 6 for 15, I. Pender 1 for 13, Tucker 1 for 2. P.A.C., 5 for 123; Piper 30, R. Pender 30, Tucker 31 not out, French 14.

v. S.P.S.C. II.—P.A.C., 56; Tucker 11, Piper 16, Wilton 14. S.P.S.C., 4 for 97; Rogers 3 wickets, Piper 1.

v. A.S. and B.T. Academy.—P.A.C., 64; Piper 28 not out. Second innings, 0 for 88; Piper 59 not out, Norton 29 not out. Academy, 38; Brooker 5 for 17, I. Pender 2 for 4, Rogers 3 for 13.

v. High School.—P.A.C., 124; R. Pender 22, Roach 37, I. Pender 24, Marshman 17 not out. High School, 57; Brooker 5 for 26, I. Pender 4 for 16.

University Life

IN A FEW RANDOM JOTTINGS BY ONE
OF THE NEW OLD BOYS.

The natural tendency for one on leaving one set of circumstances and coming into a new sphere with new relations and environments, however young he may be, is to philosophize on his changed state. And now having passed through College to the larger life of the University, though still "incompetent youngsters" with crude ideas on most subjects, we are sometimes compelled to reflect on the contrasts of the two institutions, both of which we claim as our own. The first thought that strikes us is the wider range of life and the greater freedom possessed by the student than by the college boy, and this is precisely where the risk comes in. The sudden emancipation from the college routine, and fixed rules for work and conduct and the accession to fuller liberty has proved the undoing of many a young fellow. The feeling that he is largely his own master, the knowledge that the old restraints have been removed has proved too much for some, and liberty has developed into licence, the principles instilled during college life proving feeble and being soon forgotten. Of course to one that has so conducted himself at college that the restrictions he has placed upon himself have been more binding than the college rules, the sudden enlargement of liberty does no

hurt, but this is a state of self-control to which the average youth does not arrive. He is more like a river whose course from having been in a deeply-cut channel where it has run clear and sparkling suddenly opens into a level plain, and there, its banks being removed, it spreads out into an unwholesome marsh. This is one of the greatest perils to a boy as he comes up to the University, and he must exercise great care as to how he conducts himself under the new conditions. A young student must also be very careful about the maintenance of his religious and spiritual nature. In the higher seats of learning there are always those who cast ridicule upon religion and upon those who are ruled by it, and one must not be easily discouraged by this class or drawn down by their deathly grasp. There is a great advantage to every Princes' man who comes up in the fact that there need be no feeling of strangeness. Former friends and companions are here, and every third fellow one meets is an old Red, ready to welcome a new arrival from his loved school. Then there is a personal welcome to everybody from a member of the Christian Union, and an earnest request to join that organisation. No Prince Alfred fellow ought to need an invitation to become connected with this most important and world-wide movement, the only one in the University which endeavours to foster the spiritual

life of the students. As to the courses to be taken up, that question was written about in the corresponding issue of the *Chronicle* last year. Every student, however, should know his own mind before entrance. The professors are always glad to see students and talk over things with them. If any specific information is required by anyone, there are many old Reds in every faculty who will only be too delighted to give any information to their schoolfellows.

A FEW POINTS TO REMEMBER.

Get your text books early.

Join the Sports Association.

Take some part in the sports and vigorous life of the University.

Don't try and take too much work on.

Do what you have to do thoroughly.

Connect yourself with the Christian Union, and put your energies into its work.

Become a member of the society connected with your faculty.

Remember that a University is not a place where you may obtain a degree merely, but where you may study character and learn to make not a living but a life.

Mock Trial.

The Committee of the Literary Society decided this year to close the session with a mock trial. Accordingly

arrangements were made, and on Saturday evening, October 9, a breach of promise case was heard in the big schoolroom before His Honor Sir Tracey Stubble-Face (Stanley). There was a good attendance of the boys and their friends.

The plaintiff was Miss Marguerita Amethyst Slappoffurhatski (Watts) who claimed damages against the defendant, Right Hon. Sir Reginald Fitzbuff, Bart. (Davey) for alleged breach of promise.

After the judge and jury had taken their places, Mr. Jeremiah Trigonometry (Snow) opened the case for the prosecution. He read several letters of an amusing nature which the defendant was supposed to have written, and brought forward arguments to prove that Jeremiah deserved to be mulcted in heavy damages.

Reginald Briefless, K.C. (Wilton), prosecuting counsel, then called his witnesses. Each witness was duly sworn by the Clerk of the Court (Cleland), who carried out his duties in a very capable manner.

Mrs. Crammemuppe (I'Anson) deposed that she kept a boarding house at which the plaintiff and her brother boarded, and that the defendant was a frequent visitor, calling eight times a week and twice on Sundays. She also said that she had heard terms of endearment from defendant to plaintiff.

Charles William Slappoffurhatski (Wall) said that in company with his

sister and the defendant he had spent an evening at the Golden Gate Hall, and had noticed the behaviour of the defendant. He also read some more letters.

Willie Crammemuppe (Sutton) told the court that on the evening of July 9, while up a neighbour's apple tree, he had overheard plaintiff and defendant in his mother's garden. (Sensation in court, caused by a juryman discovering the thief who had been taking his apples). When cross-examined this witness said he was five years of age. He would not swear he saw the defendant, because his mother had told him it was wicked to swear.

Baron Popp-Off, formerly a corporal in the German Army, said he was a boarder at Mrs. Crammemuppe's, and that he had seen plaintiff and defendant in close proximity in the sitting room on May 24. Considerable difficulty was experienced in understanding this witness, and the Court Crier (Howard) had to act as interpreter.

Sir Robert Ardraga, K.C. (Reed) then called his witnesses for the defence.

Polly Tintooth (Gilding) said she was the maid at Mrs. Crammemuppe's, and the confession was finally wrung from her that she and a policeman were in the sitting room on May 24.

Thomas Barebones (Allen) told the court that he was the defendant's valet, and that his master had always acted as a perfectly rational being. On cross-

examination he could not say where his master was on the evening of the 9th July.

Rupert Globetrotter (Millhouse) said that he had once been in an "hanimal hemporium," and that his wife was a washerwoman. He had met plaintiff at the Parkside Lunatic Asylum.

The defendant made a speech disclaiming any but the most ordinary civilities to the plaintiff, and emphatically denying the breach of promise, as there had never been an engagement.

The defending and prosecuting barristers then made their final speeches, the Judge summed up, and the Jury retired.

On returning, the foreman (Guymer) brought in a verdict for the plaintiff, and His Honor awarded her a farthing damages, not to carry costs.

In conclusion we desire to express our thanks to Mr. Bröse for his generous loan of wigs, and to Miss Chapple and Nurse Eley for their assistance with the costumes.

Visit to the Adelaide Observatory.

On Friday evening, October 15, at the invitation of Mr. G. F. Dodwell (an old Red), Government Astronomer, a visit was paid to the Adelaide Observatory by the members of the Upper Sixth Form, under the leadership of our Science Master, Mr. J. D. Iliffe,

Several large lunar photographs were first inspected. These were very interesting, and were greatly admired. We then passed on to the Transit Room, where the chief objects of interest were the large meridian telescope with its carefully graduated circles and reading microscopes, the electrically controlled recording apparatus, and the large sidereal timekeeper. Mr. Dodwell gave an interesting and instructive explanation of the use and functions of the various instruments, after which the party adjourned to the Observing-dome, where all were afforded an opportunity of examining, under a power of some 200 diameters, several of the most interesting of the celestial bodies. The snow-cap on the north pole of Mars was clearly defined, and Saturn, whose rings have opened out considerably since our last visit, presented a truly glorious spectacle. The great Equatorial was next directed to a brilliant double star which was very easily separated, and which called forth many expressions of admiration. A fine star cluster also proved a beautiful object.

During the evening the telescope's camera attachment was shown, and the rapid sun-spot shutter examined. At the close of the evening a vote of thanks was passed to Mr. Dodwell for the opportunity so kindly afforded us of paying this instructive visit to the Observatory, and of contemplating some of the glories of the heavens. We feel

sure that a latent astronomical interest must have been fired to enthusiasm in the hearts of more than one of us that evening. Our hearty thanks are due to Mr. Iliffe for arranging the trip.

Valeta.

P. E. CORRELL.

1906—Passed Junior with honours
(seven subjects, six credits;
sixth place on Honour List).

Won Alfred Muecke Prize.

1907—Passed Senior with Honours.

1908—Passed Higher Public.

Cotton Medal for Agricultural
Chemistry.

1909—Dux of College.

Member of "Chronicle" Com-
mittee.

Passed Higher Public with
honours (seventh place in
Honour List, credit in Chemis-
try).

Gained Angas Engineering Ex-
hibition.

Qualified for Government
Scholarship.

Old Collegians' Scholarship.

G. S. REED.—1901-9.

1901—Entered School and placed in
First Class.

1905—Passed Primary.

1906—Passed Junior with honours.

1907—Passed Senior.

- 1908—Passed Higher.
Lieutenant, Treasurer of Christian Union.
- 1909—Passed Higher with honours, obtaining both the Colton and a University Scholarship.
Passed Lieutenant's exam with honours.
Again Treasurer of the Christian Union.
Secretary to Literary Society.
Manager of the "Chronicle."

K. N. STEELE.—1902-1909.

- 1905—Member of Cricket First Eleven.
1906—Member of both Cricket and Football First Teams.
Passed Junior.
1907—Vice-Captain of both teams.
1908—Vice-Captain of both teams, voted to be best all-round man in football; received Sports badge for both.
Passed Senior.
1909—Captain of both cricket and football, best all-round man in both.
Secretary of Sports.
Lieutenant in Cadets.

F. L. WALL.

- 1906—Passed Junior with honours.
Ran in Intercollegiate Sports.
1907—Passed Senior with honours.
1908—Passed Higher with honours.

- 1909—Passed Higher with honours, obtaining the John Dunn Scholarship.
Passed Lieutenant's exam.
Member of "Chronicle" Committee.
Ran in Intercollegiate Sports.
Member of Intercollegiate Tennis Team.

I. B. PENDER.

- 1906—Placed in Lower IV.
1907—Upper IV. Passed the Primary.
1908—Upper V.
Won College Sports Cup.
Ran as senior in the Intercollegiate Sports.
Member of Football Eighteen.
1909—Lower VI.
Again won College Sports Cup.
Won Hurdles and Steeple in Intercollegiate Sports.
Member of Tennis Team.

Clem Hill still continues to hold the rank, according to nearly all the best judges, of the "finest batsman in the world." His scores for South Australia against New South Wales and Victoria, 176, 205, and 185, were magnificent chanceless innings.

Dr. F. J. Chapple has transferred his medical practice to Clarendon.

Jottings from Rangoon.

We have had a short break in the "rains," and for three days it did not rain at all. The days were as near perfect as you get out here, and fell very fortunately for me. One was a "paperchase" day, and we had a long and glorious run. My horse is not jumping as well as he did before the rest I gave him. Another of the fine days was perhaps the most interesting one I have spent here. I went with some others, including two of my burrasahibs, up to Watayah to see about the storage of logs there. We left here early in the morning in one of our launches. The trip up the river is pretty, though the banks down here are all along very low. Arriving there we went in a sampan, accompanied by numerous Burmans crowded into their rummy little dug out canoes or laungs. We got as near the banks as we could, then changed into the little flat-bottomed canoes; the Burmans got out and pushed us over the mud to the logs by the shore. I saw one man who accidentally trod on a fish in the mud, stop and carefully throw it into the water, as it is one of the first principles of their beautiful religion not to take life in any form. We then started to cross a swamp by what was called a path, but we sank to our knees in mud most of the way, and had men ahead

cutting a path with their dahs, and we were glad when that part was over. Getting back to the sampan the men shoving the canoes (though well up to their waists in mud) cheerfully had a race to see who would get there first. We got back to the launch, to a well-earned "tiffin," and after inspecting the rest of the logs from the launch got back to Rangoon in time for dinner, very happy and frightfully sunburnt. I learnt a good deal about logs and their storage from our experts.

Am having rather an amusing time at present. So far I have been giving most of my spare time to learning Hindustani, which is the language generally in use in the workshops and the mill, but now that I have got a fair working knowledge of that I am turning my attention seriously to Burmese. So I have got rid of my Madrassé servant, and have secured instead a Burman who can speak no English; so now I am no longer "master" to my "boy," but "thakin" to my "lugli." Burmese is a very pretty, but very difficult language; it is entirely a matter of sound, and if you get the pronunciation the least bit wrong you are probably saying something different from what you intend. When I have got a little ground work to go on my head master is going to "Moonchee" me.

I am having bad luck with the elephants just now, and four out of

eight are sick. It is unfortunate as there is a lot of work to do; they have had heavy work in the heavy rains. The break in the rains still continues, and the riding is just perfect. My horse does not mind how high the jumps are, but he always approaches the broad jumps and ditches with caution, as he likes to get a good look at them first. I shall be sorry when the season closes, but hope with a bit of luck to get hold of a polo pony in the "cold" weather, and if I can get a couple of "chukkers" twice a week it will give me plenty of interest and exercise.

We are very busy just now getting logs on the land here. I have to go on a Durwan's back if I want to get to some parts of the depot here. It is one of the most interesting sights I have ever seen. About sixty men and seven or eight elephants shoving logs up on the land out of the river. The Burmans were thoroughly happy swimming about, shouting and laughing.

Put in a very good Saturday last week. Three of us, including our burra-sahib, took one of our launches, and starting a la bonne heure, went up the river for a day at the famous snipe. We had a splendid day's sport, and I find I can shoot quite straight with the extremely nice gun my friend gave me when leaving England. The Burman is a great sportsman, and though he will not take life himself, is only too

pleased to be asked to act as your "shikaree" (gun-bearer).

Another splendid half day's shooting last week. It is curious what fascination the snipe shooting has, especially as the conditions, quite opposite to a grouse moor, are not ideal. It is either very hot or you get soaked by an early shower, and spend the rest of the day up to your knees in mud and to your waist in water, but still it fascinates. Next week we have a coolie holiday, and I am going either to Tog-yaung-gale (which means the little wild cat) or Kyanktan, sleep the night there and hope to get a good snipe day. I have sent my shikaree up to-day to find a new snipe ground.

The new mill starts at my depot tomorrow; this means about a hundred new men to work and live here, and much excellent new work for me. This will be timber work, and I like it much better than the ordinary engineering work. Of course I am not yet a timber expert, but I have got a very good native man here, and I have the management of the whole place. The new mill started here, of which I am in charge, means a great deal more work for me, but splendidly interesting and so pleasant work. As there was so much to be done I had to forego my little shooting trip; but there is a Burmese holiday again quite soon, and I hope I shall be able to manage it then.

I was interested to watch each sawyer before he started working his new saw in the mill putting in a little quiet worship to it.

I attended a very large formal dinner at Government House last night. The majority of people you meet at these shows are naturally I.C.S. Last week the Government House party gave a very pleasant finish to the Hunt Club. The start and finish were both in their compound, and there one's boy was waiting with a change of clothes, and then we had a very pleasant little dance after it. My burra-sahib is away on leave up in the hills just now; fortunately everything so far has gone smoothly.

To-day is a curious day here. It is the end of the Mohammedan Lent, and we keep the mill going with difficulty, as all the launchmen, boiler attendants, engine drivers, and pooniwallahs who are Chittagonians, are off to their mosques to worship. I meet a lot of them coming to the mosques on the premises here, and they look very happy and very clean in their best bright costumes as they conscientiously, and I think reverently, go off to bow before the unknown God. Yesterday they were not quite sure whether the holiday was to be to-day or to-morrow; but last night they saw the moon so to-day they will worship and feast. There are no offerings to be made to-day, those

will come later at the next festival. They are a weird childlike crowd, and often come crying to me to have their disputes settled.

To-day is a Burmese holiday so I have a little more time for squaring up arrears. Last night was the great night at the Pagoda, and again I fell under its fascination. A bright perfect moonlight night; the clean bright costumes and flashing jewels of its merry worshippers; the flash and glitter of the gilt on the shrines; the myriad little candles, and above all from high upon the big Pagoda, the silvery notes of the tinkly, temple bells, make up a scene whose charm it is impossible to exaggerate. One met the merry jungle Burman, driving in, in his quaint cart, drawn by his pair of mild oxen. They come in by thousands for these festivals, for is not this the famous Pagoda built over eight of the true Buddha's hairs, and is not much merit to be acquired by worshipping there?

The cold weather is supposed to be due here now, but the drying up process still continues. We have just got out a big new steam launch from England, and it is being erected here under my supervision. The work is most interesting and instructive. It is grand to see it gradually grow into shape from the first laying down of the keel.

A party of 700 Americans have char-

tered a White Star Liner and are making a trip round the world. We have just received word from our head office in Bombay that they are coming to Rangoon, and that we are to let them see our elephants at work. So I shall have to make arrangements for them to do so, as Dallah is the only place down here where we have many at work. It is easy to turn on a half-a-dozen elephants to do their tricks, but the difficulty is to get the people across the river, as our launches will only hold about 30 each. However, that will be arranged somehow, and it ought to be rather a rag.

Masonic Notes.

The annual dinner of the Prince Alfred Collegians' Lodge, No. 51, S.A.C., was held on Tuesday, September 28, at Bricknell's Restaurant, Hindley Street, when 30 brethren were present, and a most enjoyable evening was spent. The Following toasts were honored, viz., "The retiring Worshipful Master"—proposer, Bro. E. H. Rhodes; responder, Wpl. Bro. J. R. Robertson. "Prince Alfred College"—proposer, Rt. Wpl. Bro. C. R. J. Glover; responder, Bro. W. R. Bayly. "The Master Elect"—proposer, Bro. A. A. L. Rowley; responder, Bro. W.

J. Angus. "The Retiring Secretary"—proposer, Wpl. Bro. W. H. Porter; responder, Bro. F. Lathlean. Songs were given by Bros. A. A. L. Rowley, A. W. G. Pitt, W. Lathlean, and W. R. Bayly, and a quartette was contributed by Bros. Rowley, Robertson, W. Lathlean, and Haslam. Bro. J. A. Haslam acted as pianist.

On Friday, October 1, Bro. W. J. Angus was installed as Master for the ensuing twelve months, at the Freemasons' Hall, Flinders Street. Notwithstanding the inclement weather there was a large and representative attendance of Brethren, amongst whom were Rt. Wpl. Deputy Grand Master and Grand Officers and eleven Wpl. Masters of City and Suburban Lodges. Wpl. Bro. J. R. Robertson, G.Std.B. acted as Installing Master, and Wpl. Bro. W. H. Porter, D.G.D.C., as Director of Ceremonies. The following officers were invested for the ensuing year:—S.W., Bro. Bayly; J.W., Bro. A. A. L. Rowley; Treasurer, Bro. F. Lathlean; Secretary, Bro. R. G. Neill; S.D., Bro. E. Bendall; J.D., Bro. E. H. Rhodes; D.C., Wpl. Bro. W. H. Porter; Organist, Bro. J. A. Haslam; I.G., Bro. W. Lathlean; Stewards, Bros. R. O. Fox, F. I. Grey, A. H. Goode, H. J. Hoath, A. W. G. Pitt, C. W. Wooldridge; Tyler, Bro. H. H. Cowell.

At the close of the proceedings an adjournment was made to banqueting room, when the usual Masonic Toasts were honored. The retiring Master, Wpl. Bro. J. R. Robertson was presented with a handsome entree dish and hot water jug by the Brethren, as a token of their appreciation of the valuable work he had done for the Lodge during the past year.

The Lodge continues to prosper, and during the year the membership has increased from 44 to 56, with 6 candidates elected and awaiting initiation. Bro. R. G. Neill, 20 National Mutual Buildings, King William Street, the new Secretary, will be pleased to hear from any old Boys who contemplate joining the Lodge.

Melbourne Branch P.A.O.C.A. •

A tennis match against St. Peter's Association was played on September 18th at the Scotch College ground, which was kindly lent by Dr. Littlejohn. P.A.C. were represented by Dr. Zwar, Messrs. A. C. and Leo Kaines, and J. H. Burgess, who succeeded in gaining a victory by 9 sets to 4. S.P.S.C. team was Messrs. W. A. Gale, J. W. Stokes, P. G. W. Bayly, and R. Egerton-Warburton.

Visit to the "Register" Printing Works.

On the mornings of Saturdays, November 13 and December 11, in response to the kind invitations of the proprietors, some thirty boys, accompanied on the first occasion by Mr. Bayly and on the second by the Head Master, were shown over the "Register" printing rooms. The courteous guide on the second visit was Mr. Aitchison. The machinery by which a daily paper is produced is truly marvellous in its delicacy and complexity, and to the uninitiated it would seem as if the machines had brains. First, there are the machines that set the type—the linotypes. The compositor sits at a key-board (resembling that of a type-writer) with his manuscript in front of him. Pressing one of these keys liberates the corresponding matrix (the mould from which the face of the type is cast). When a line of these matrices has been set up a long arm moves down and brings them into position near a supply of molten metal, a spray of which is emitted and transformed into a line of type by contact with the line of matrices. The matrices are then carried by the arm to the top of the machine and automatically distributed to their respective places, and are thus ready for use again immediately. This operation is truly a

marvel of ingenuity. Each matrix has a distinctive shape of its own resembling the wards in a Yale key, and travels along a rod until it reaches its own corresponding ward or slot, and is instantly released and falls into its own place. After the lines of type have been set they are made up into columns and then into pages, and are then imposed in a chase, and carried off to the stereotyping room. Here a damp sheet of thick paper awaits them, and they are pressed on it. This paper mould is quickly dried, placed firmly in an iron cylindrical frame, and molten metal is poured in, thus forming the surface to print from. While still hot, the metal is planed and trimmed. When all the plates have been prepared they are placed in the printing machine. This machine is a wonderful and complex piece of machinery, built by Hoe. Rolls of paper that are miles long, are placed on shafts at one end of the machine and the paper is carried right through, being printed on both sides at once. At the other end the newspaper, as we know it, emerges cut and folded all by machinery. The machine can turn out 20,000 copies per hour.

Each of the boys was presented with a copy of the paper when printed, and his own name set up in type. The motive power for the machinery is electricity, which is now superseding steam very rapidly.

The whole process was very interest-

ing and amazing. Division of labour carried to perfection; each man in his place, skilled, prompt, energetic; machinery to do the work, but man's marvellous mind to invent, guide, and control it.

In conclusion, we desire to thank the proprietors for their kindness in allowing us to see over their most interesting building, also our thanks are due to Mr. Aitchison and many others for unflagging patience in explaining and illustrating the various processes.

That interesting and precocious pupil who is always said to date from a Board School is now in Cardiff, and is said to have turned out the following piece of original composition:—"King Henry 8 was the greatest widower that ever lived. He was born at Anne Domino in the year 1066. He had 510 wives, besides children. The first was beheaded and afterwards executed, the 2nd was revoked. She never smiled again. But she said the word 'Calais' would be found on her heart after her death. The greatest man in this reign was Lord Sir Garret Wolsey. He was sir named the Boy Bachelor. He was born at the age of fifteen unmarried. Henry 8 was succeeded on the throne by his great grandmother, the beautiful and accomplished Mary Queen of Scott, sometimes known as the Lady of the Lake, or the Lay of the Last Minstrel."

Prince Alfred Old Collegians' Association

ESTABLISHED 1878.

OFFICERS, 1908-1909.

Patron—The Head Master.

President—Mr. W. R. Bayly.

Vice-Presidents—Messrs. A. W. Piper,
M. M. Maughan, and A. C. Catt.

Hon. Treasurer—Mr. A. G. Collison.

Representatives on College Committee
—Messrs. C. R. J. Glover and E.
J. W. Ashton.

Hon. Auditors—Messrs. R. G. Neill
and C. Viner Smith.

Committee—Messrs. R. W. Bennett, A.
W. Collins, P. E. Johnstone, H. P.
Goode, R. F. Middleton, F. N.
Simpson, and H. W. D. Stoddart.

Hon. Secretary—Mr. H. W. A. Miller.

Hon. Assistant Sec.—Mr. C. E. Bennett.

Melbourne Branch—J. H. Burgess, 121,
Queen Street, Melbourne, Hon. Sec.

Sydney Branch—Alfred G. Newman,
Vickery's Chambers, Pitt Street,
Sydney, Hon. Sec.

The objects of the Association are:—
To keep Old Boys, wherever they may
be, in touch with one another and with
the boys at the school; also to foster
and maintain their interest in the
School.

The P.A.C. Chronicle, of which a large
part is devoted to matters of special

interest to Old Boys, is forwarded to
each member of the Association.

A dinner is held annually, at a time
which is thought likely to give as many
Old Boys as possible an opportunity of
meeting one another; and social
gatherings are held whenever any
occasion arises that makes them desir-
able.

The Association gives annually to
the School the Old Collegians' Scholar-
ship, of the value of fifteen guineas, and
donates five guineas per annum to the
Sports' Fund. A Scholarship has
also been founded, according to the
terms of which the members of the
Association have the right of nomina-
ting annually the son of one of their
number for one year's free education
at the School.

The subscription is five shillings per
annum. The simplest way is to
send along a pound for four years, or
to make a life payment of three
guineas. Any Old Boy wishing to
become a member can do so by for-
warding his name and address to the
Head Master, or to any member of the
staff, or to the Hon. Secretary.

H. W. A. MILLER,
